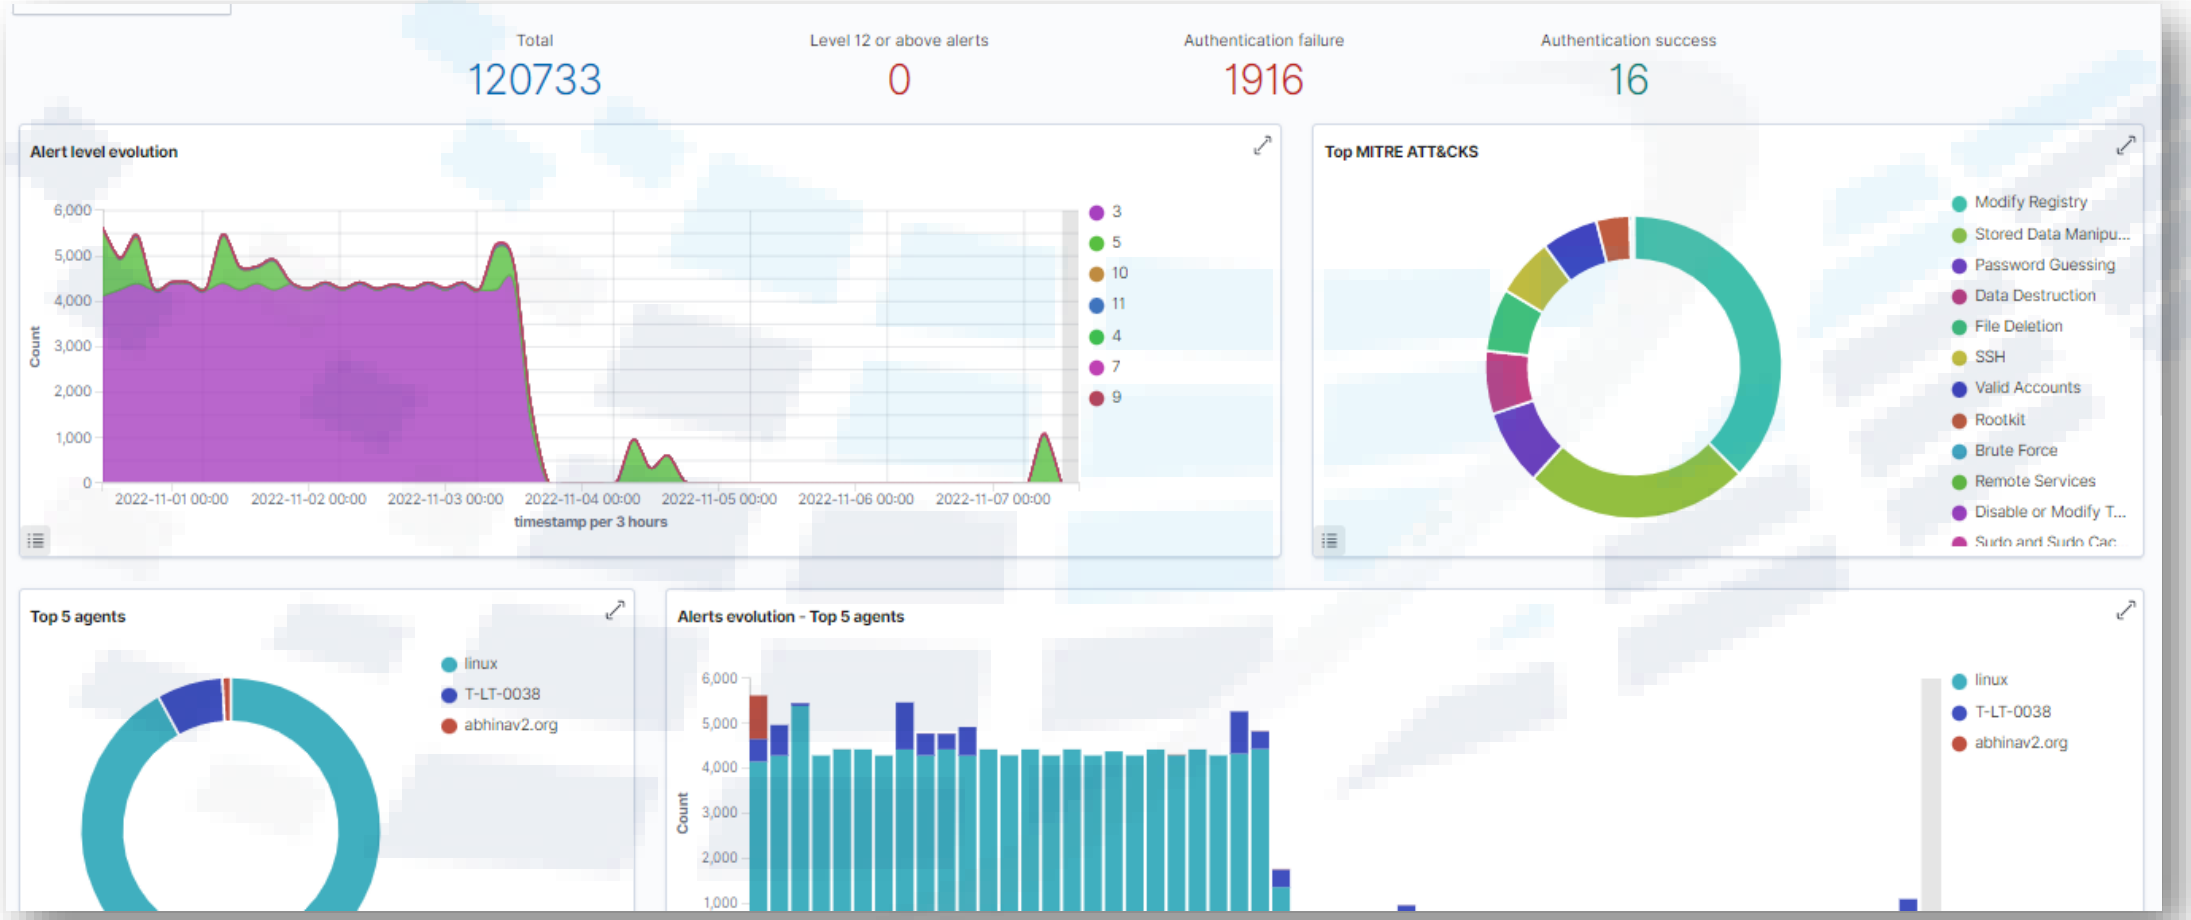
Hello!!
We are TechBridge,
World's leading Product &
Solutions Company
TechBridge
Making the World Smarter

# The Unified Dashboard for NOC and SOC



# How to Approach SOC/NOC Integration

STEP 01

**Contain the Diversity of Toolkits**

STEP 02

**Balance IT versus Security**

STEP 03

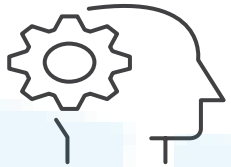
**Right-Size Each Team**

# Integration of SOC/NOC

## Organizational level

- Collaborating
- Cross-correlating
- Identifying common patterns

## System level



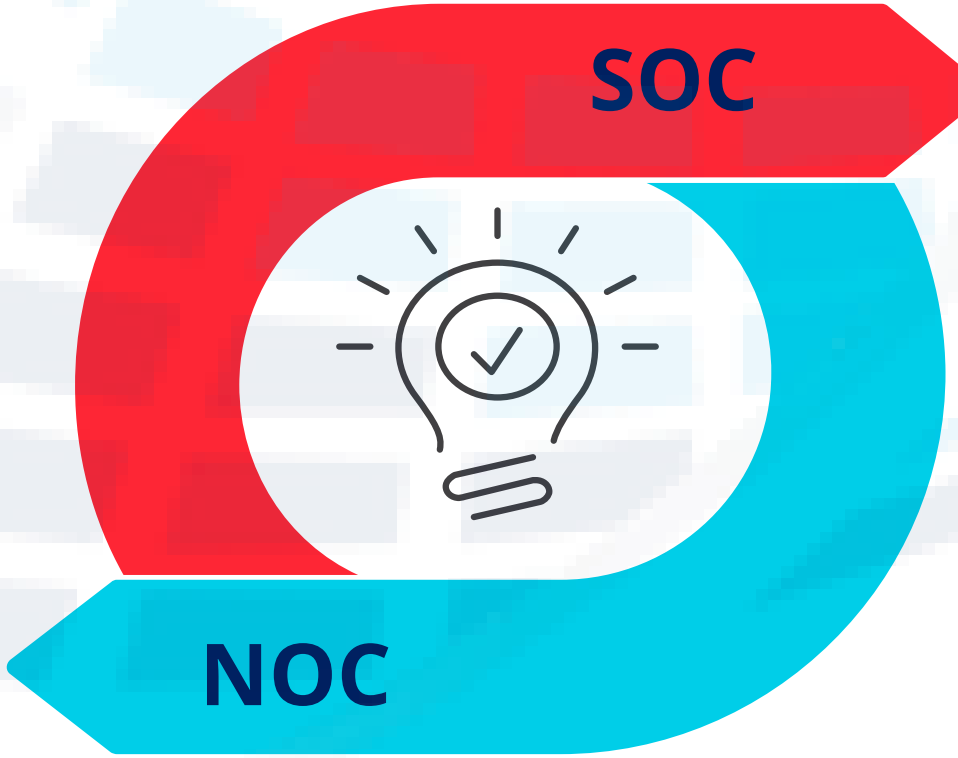
- SLA
- SOP
- Integrating Processes
- Integrating Structures

## Asset level

- Common information
- Common Aggregators
- Distribution Across Tools

# Where the SOC and NOC have Natural Overlap

- Incidents which can take long hours to resolve
- Huge cost to maintain the IT Infrastructure in absence of threat intelligence
- Threat Prevention techniques can improve IT SLAs



- Process alerts from log sources
- Utilize Common Alert system for inter and intra team collaboration
- Set and enforce policies in their respective domains
- Use incident response plans to investigate alerts and resolve threats.

## Better security

Teams work together, it strengthens the organization’s security posture.

## Improved network performance

By working together, the teams can get to the bottom of a network performance problem and fix it quickly.

## Improved operational and cost efficiency

Operational efficiency cuts the time spent on routine processes, freeing up security practitioners to engage in more strategic activities. .

## Improved response time

When it comes to stopping the bleeding during an emergency, faster response time translates into reducing the financial impact of a breach.
