

FTTx: Fibre to the eXponential

Strategic Direction and Implementation
of Broadband Infrastructure

www.sterlitetech.com

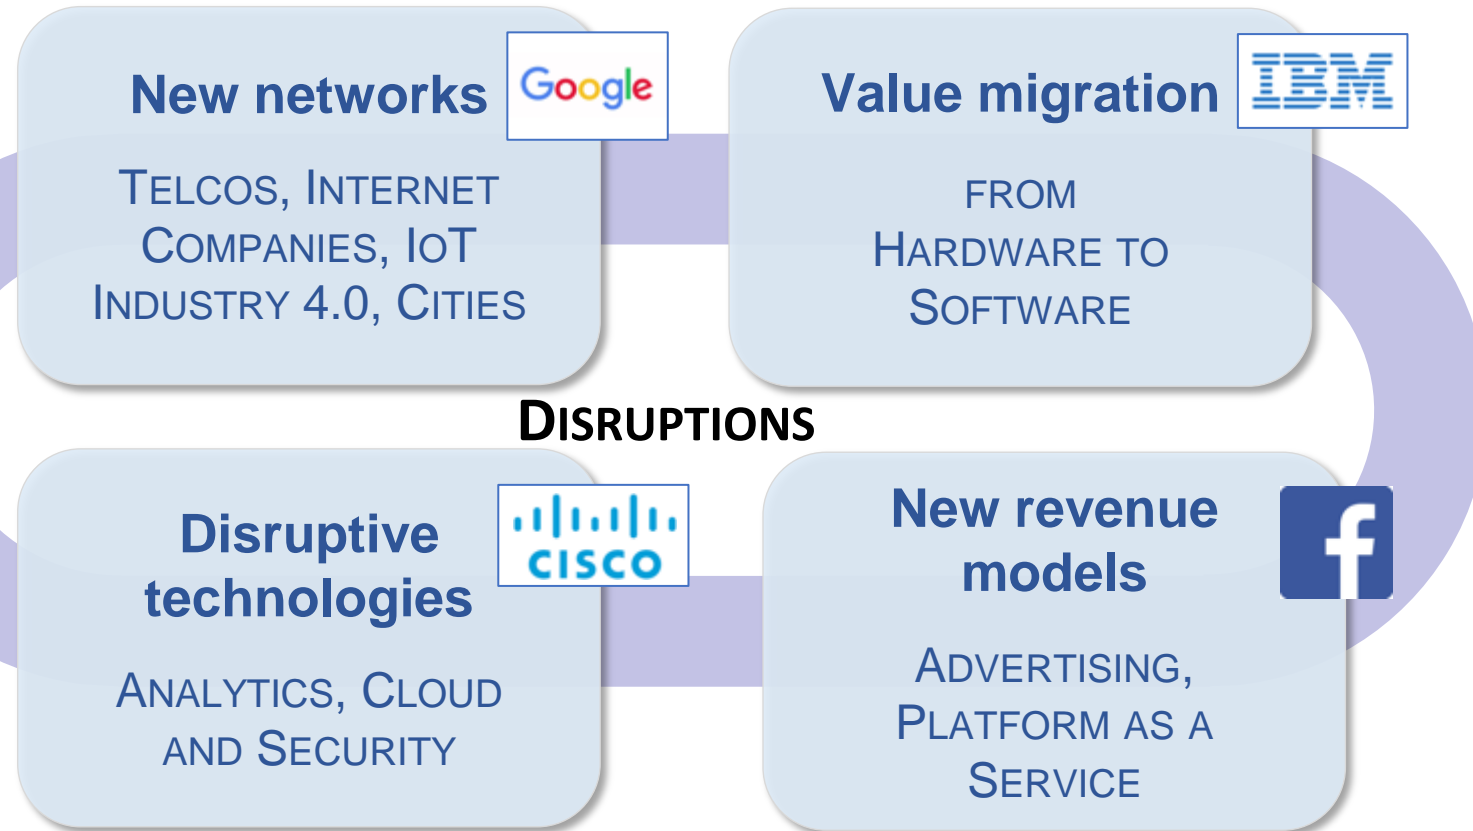

KS RAO
CEO – Telecom Services Business
Sterlite Tech

An expanded ecosystem of apps requires hyperscale network

- On the Go (Fully Mobile)
- Nomadic (Fixed Access with Limited Mobility)

Industry wide disruptions to meet the hyperscale demands

But current network design and topology is constrained

Future network will be virtualized and fibre dominant

Today's Network

Complex and expensive

Proprietary software

**Customised and
dedicated hardware**

Wireless dominant

Future Network

Flexible and agile

**Vendor neutral &
software driven**

**Commoditised and
virtualised hardware**

Fibre dominant

Industry Govt. collaboration on Ease of Business

Process
Simplification

Stringent
Compliance

Technology
Support

Accelerated readiness of Hyperscale Network and
faster implementation of NDCP

Connect India

- 50 Mbps citizen coverage,
- fixed line BB access to 50% households
- 10M Wi-Fi hotspots
- National broadband mission -BharatNet, GramNet, NagarNet, Jan Wifi
- Fibre first initiative, National Digital Grid, BB Readiness Index

Propel India

- BB Infra essential status
- License reforms and ease of business
- Expanding local manufacturing and R&D for innovation

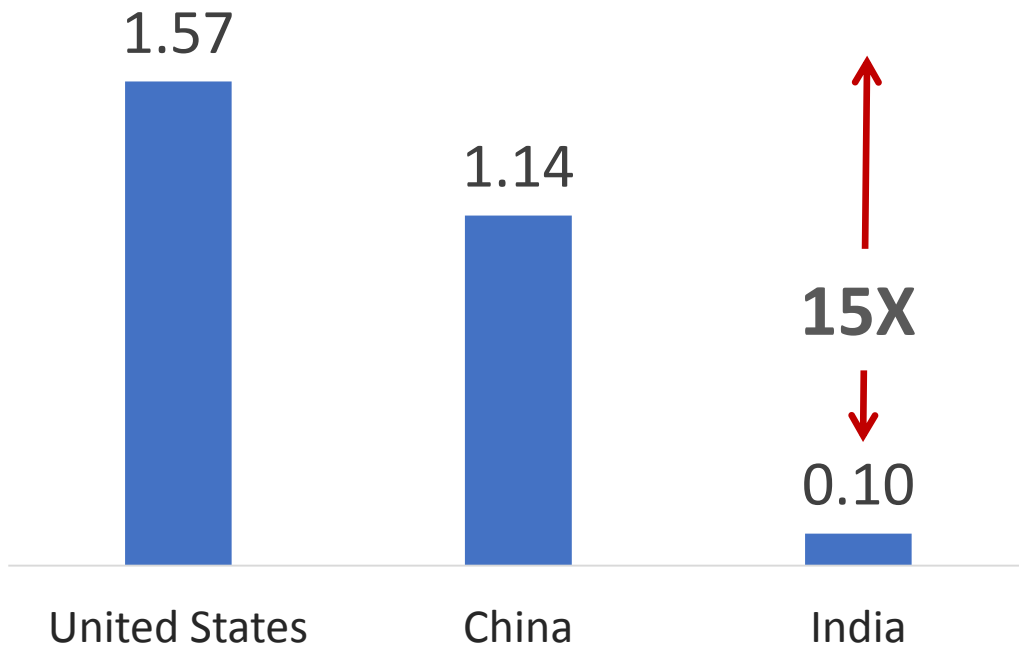

Secure India

- Assuring security framework to infrastructure
- Provisions for physical and cyber security

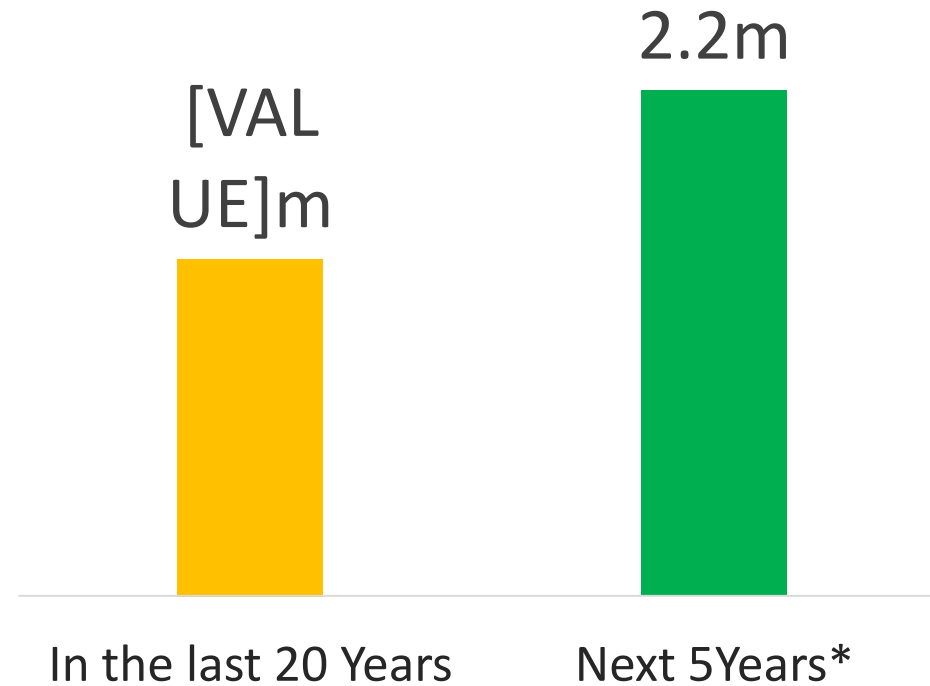

Establishing BB Infra essential Status and Fibre a Public Utility

Deep fiberization is the natural next step

Fibre consumption (fkm) per capita

In next 5 years India must deploy **2.2 million km** at **~5X speed**

But India offers some unique challenges

Shallow trenches
½ meter?

Rock conditions

Information NA

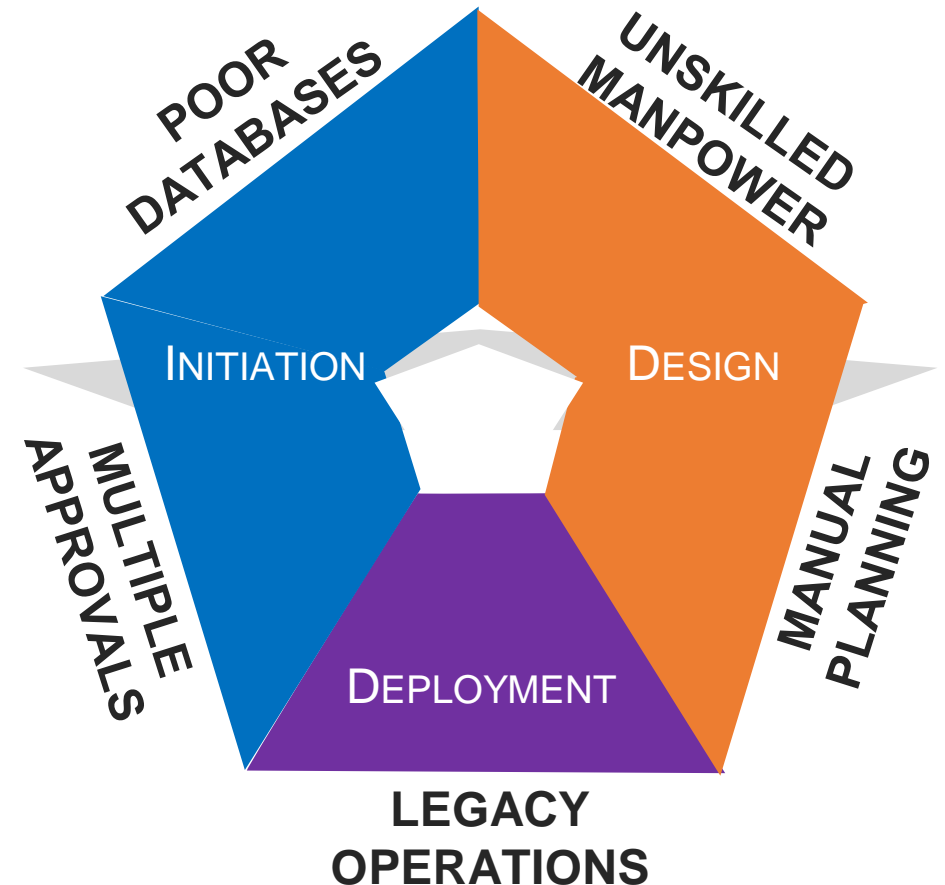

Poor trench bed
preparation

Open manholes

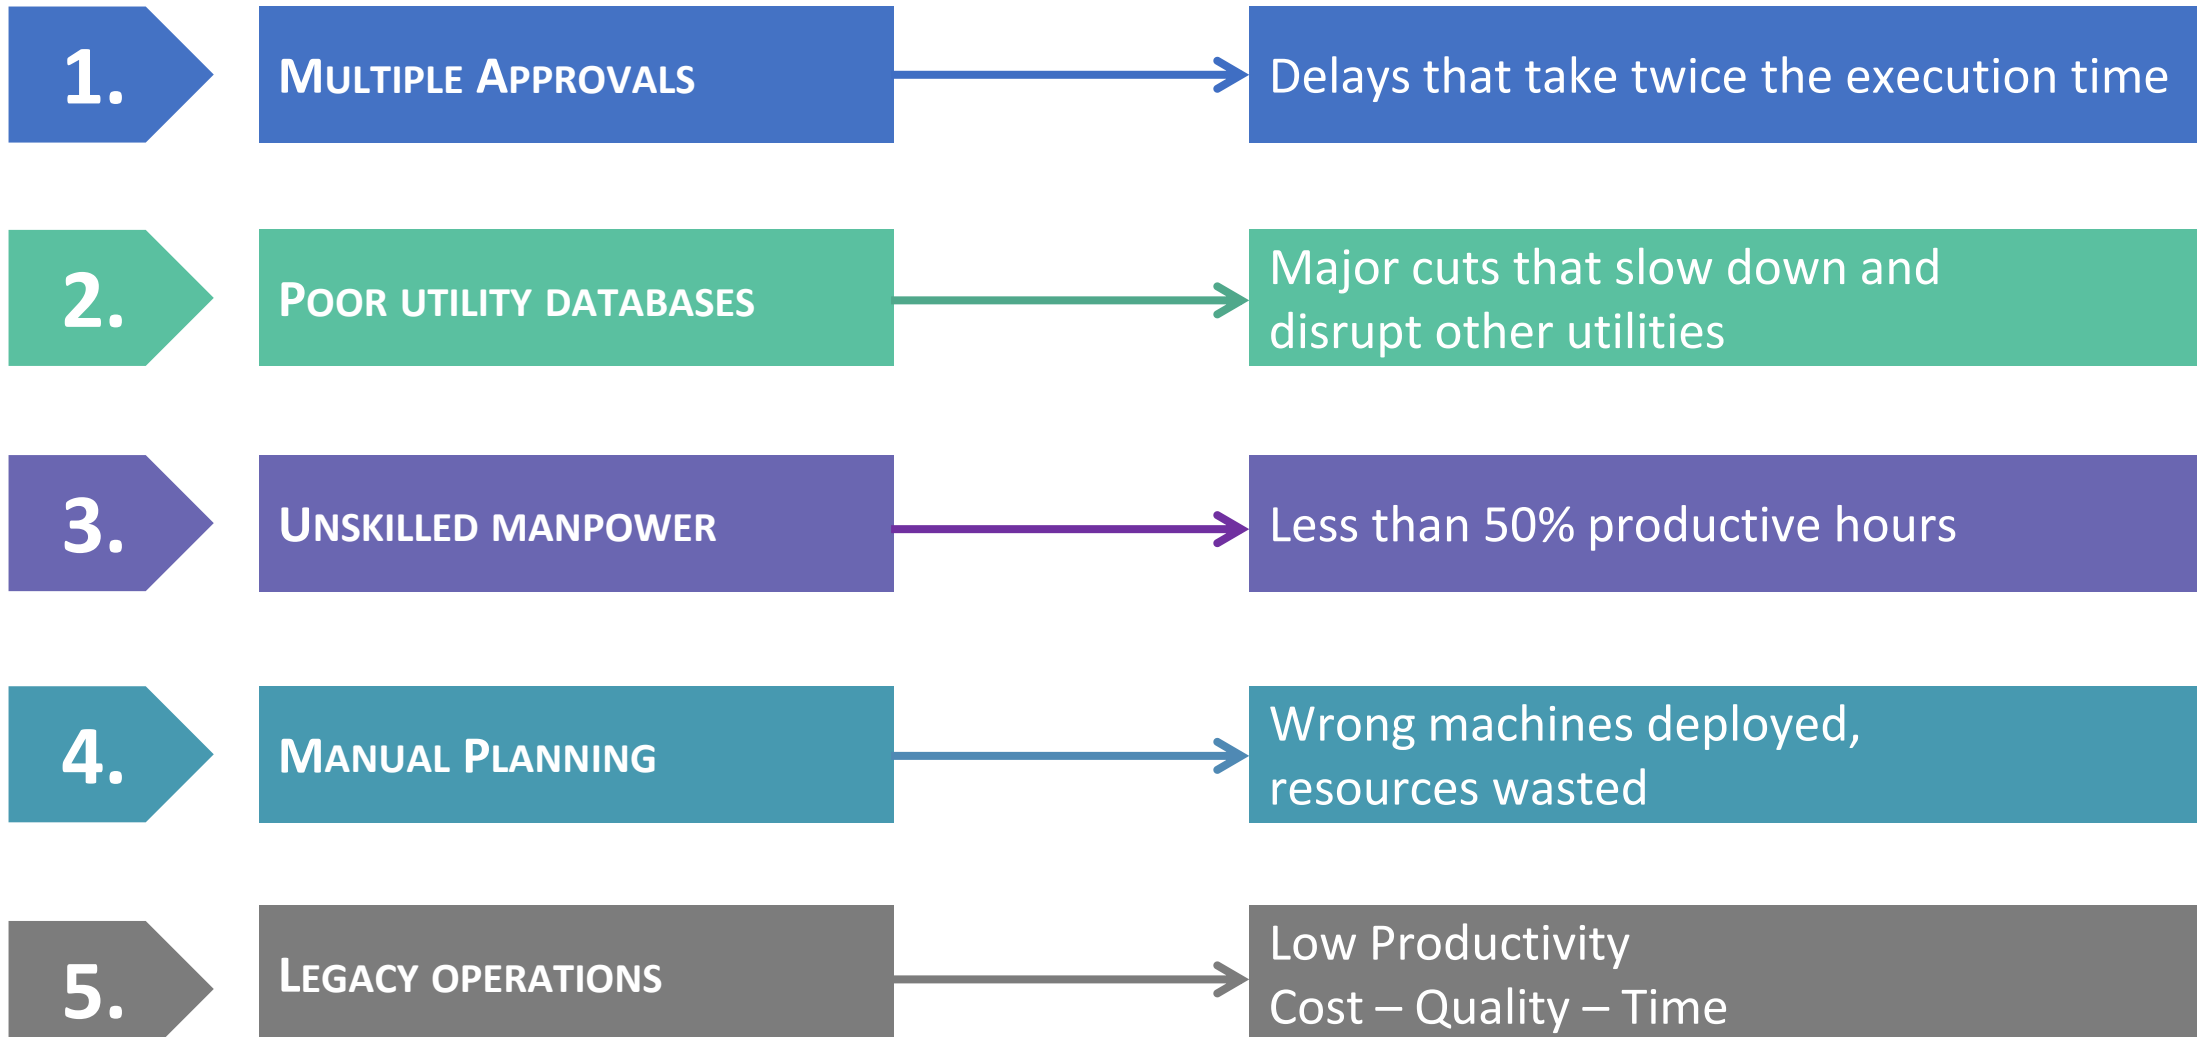

Operational Challenges

Deployment Challenges impacting cost and timelines

CHALLENGES

IMPACT

CHALLENGES

SOLUTION

1.

MULTIPLE APPROVALS

- RoW blanket approval
- Minimum touch points

2.

POOR UTILITY DATABASES

- Central database for GIS mapping
- Electrical resistivity surveying

3.

UNSKILLED MANPOWER

- Fibre certification program
- Program management certification

4.

MANUAL PLANNING

- Design led planning
- Risk mapping

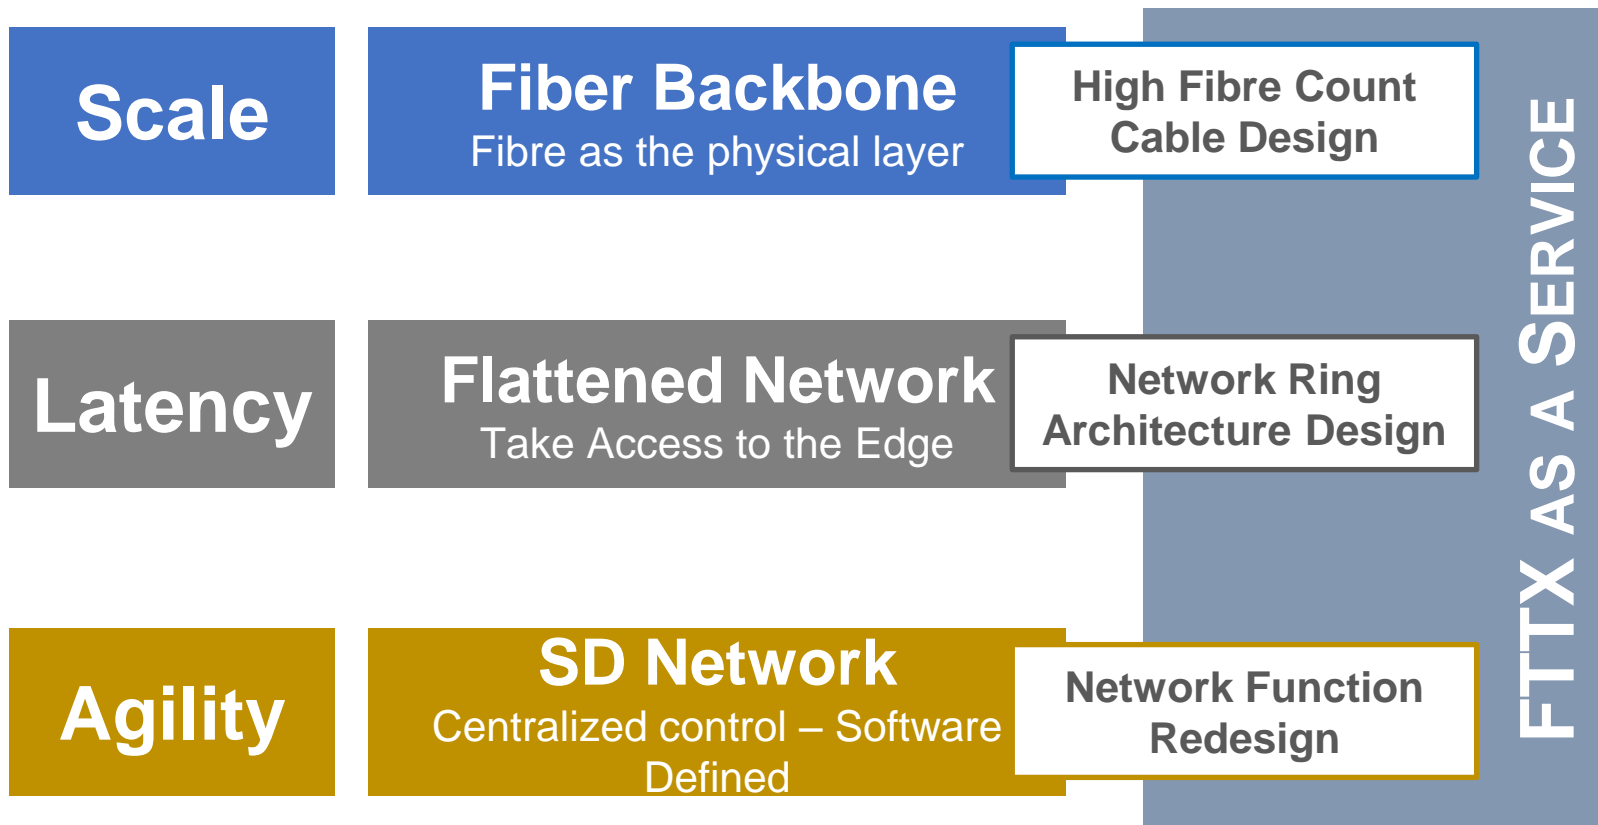

5.

LEGACY OPERATIONS

- Mechanization in daily operations
- Incentive based pay system

Recommendations and design framework for implementation of hyperscale networks

DESIGN FRAMEWORK

RECOMMENDATIONS

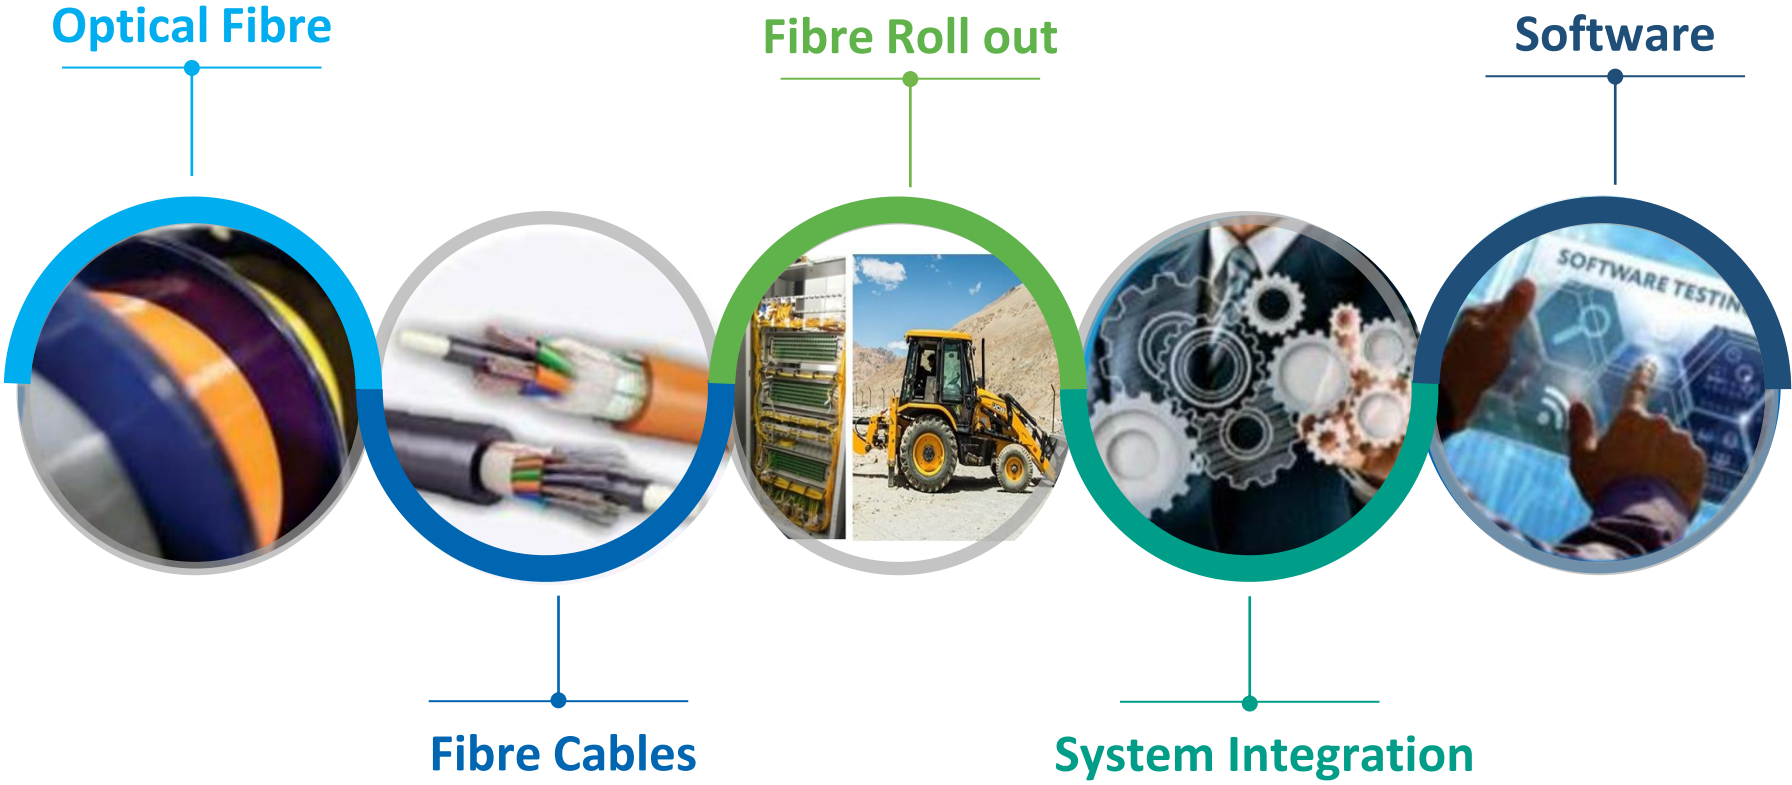

- Fibre deployment synergies with other utilities
- BB infra expert as part of city planning
- Building codes must include fibre
- RFP reforms in large scale Govt. deployment

Our capabilities across value chain

Presence in over 100 Countries

Partnering with 8 of top 10 Global Telcos

3 RESEARCH LABS, 7 PRODUCTION FACILITIES

Sterlite Tech : Designing, Building and Managing Smarter Networks

Thank You
