

Integrated Command And Control Center

Smart & Safe City Initiative

A unified platform of shared information to ensure a common, coordinated, effective response.

Brief Profile

Established in 1976, we are one of **earliest IT companies scripting India's Digital Story**

4500+ people apply insights to create innovative solutions to your business needs

For over **four decades**, we have been successfully integrating people, business and technology to create effective, sustainable business ecosystems

With a footprint across over **100+ locations**, we deliver business consulting, systems integration, IT solutions and Internet of Things (IoT) expertise across industries and business functions

Uninterrupted record of **profitable growth**

Continuous track record of innovation. **Dedicated Product Development Centre** since the 90s

Certified **CMMI Level 5, ISO 9001, ISO 20000, ISO 27001, ISO 14000 and ISO 45000**

CMMI DEV / 5
The Standard Approach

Four Decades of IoT / Smart City Experience

1976

- **CMS is born**
- Mr. Ramesh Grover starts Computer Maintenance Services

1976

1985

1985

- **Set up Product Development** ★
- R&D unit set up Design in India, Make in India for the Traffic Industry

1989-1995

LED based Aspect
Synchronized signals at 109 intersections – Bombay
Vehicle Actuated Signals at Delhi

1989-95

1996-1999

1996-1999

- **First ATC in India** ★
Setup India's first ATC in India at Delhi.

2000-2001

- **Foray into ITMS** ★
- Introduced Automatic Vehicle Counting, Classification
- **Introduction of VMS**
- GSM based **Solar Emergency Telephone** system for Mumbai-Pune Expressway

2000-2001

2002-2004

2002-2004

- **First Public Safety deployment** for MNW project. ★
- **Electronic Toll Collection automated system** for Mumbai Pune Expressway

2005

- **Vehicle Actuated Signals introduced**
- Traffic Signal set up across Chennai, most major Indian cities

2005

2006-2007

2006-07

- **Automated Parking system** - Setup at Delhi's Palika Bazaar. ★
- Traffic Signals across various countries – Guyana, Bangladesh
- VMS system across Mumbai for Disaster Management

2008

- **Mumbai ATC** ★
- Won Asia's single largest Traffic ATC order worth 55 Crores across Mumbai City & parts of suburbs

2008

2016-18

2016-18

- **Vadodara Smart City** ★
- **India's first Smart City inaugurated by the PM.** CMS technology at work
- **Mumbai City Surveillance** ★
- **Rajasthan Safe Cities**
- **Vizag Smart City**

2019-21

2019-2022

- **EWDS NCRMP** ★
- **Early Warning System for disaster management** across the entire state of Kerala
- **Nashik SC**
- **Kalyan Dombivali SC**
- **Bhagalpur SC**
- **Muzaffarpur SC**

CMS's Smart City Experience

Vadodra Smart City

- SITC of ICCC with integrations
- SITC, of citywide video surveillance system
- ANPR System and Video Analytics
- Adaptive Traffic Control System
- VaMS, ECB & IPPA System
- Environment Sensors

Vizag Smart City

- Adaptive Traffic Control System
- AI based vehicle detection and classification system.

Kalyan Dombivli Smart City

- Efficient Traffic Management With Adaptive Traffic Control System
- RLVD & Enforcement System
- ANPR at city Entry / Exit roads.
- Variable Message Signs
- Emergency Call Box
- IP based Public Address System

RajCOMP Info Services Limited

- Crime detection and prevention with city wide surveillance system
- ANPR Cameras
- ITMS Sensor for Counting & Classification
- Emergency Call Box
- Rugged Tablets
- Wireless Communication System

Nasik Smart City

- Efficient Traffic Management With Adaptive Traffic Control System
- VaMS & IP based PA System

CMS's Smart City Experience

Kerala EWDS

- SEOC setup with Command Control (CCC), CAD, Contact Center and Mass Notification Software
- Alert broadcast using High Power Sirens installed on Mobile Towers.
- CAD Software to inform and despatch Emergency Responders

MCGM Mumbai

- Traffic Management Control Center at Traffic Police HQ
- Satellite Control Room at MCGM
- Up-gradation of Traffic Signal System to Adaptive Control System at 253 intersections in Greater Mumbai.
- Junction Surveillance for efficient Traffic Management.

Chennai

- Traffic Management System for Chennai Traffic Police
- Delivery of 392 Citizen Services across Tamil Nadu
- Port Operations Control Center at KPL

Bhagalpur Smart City

- ICCC Application with Integrations
- Adaptive Traffic Control System
- RLVD & Enforcement System
- Variable Message Signs
- Emergency Call Box
- IP based Public Address System
- ERP, eGov & Web Portal

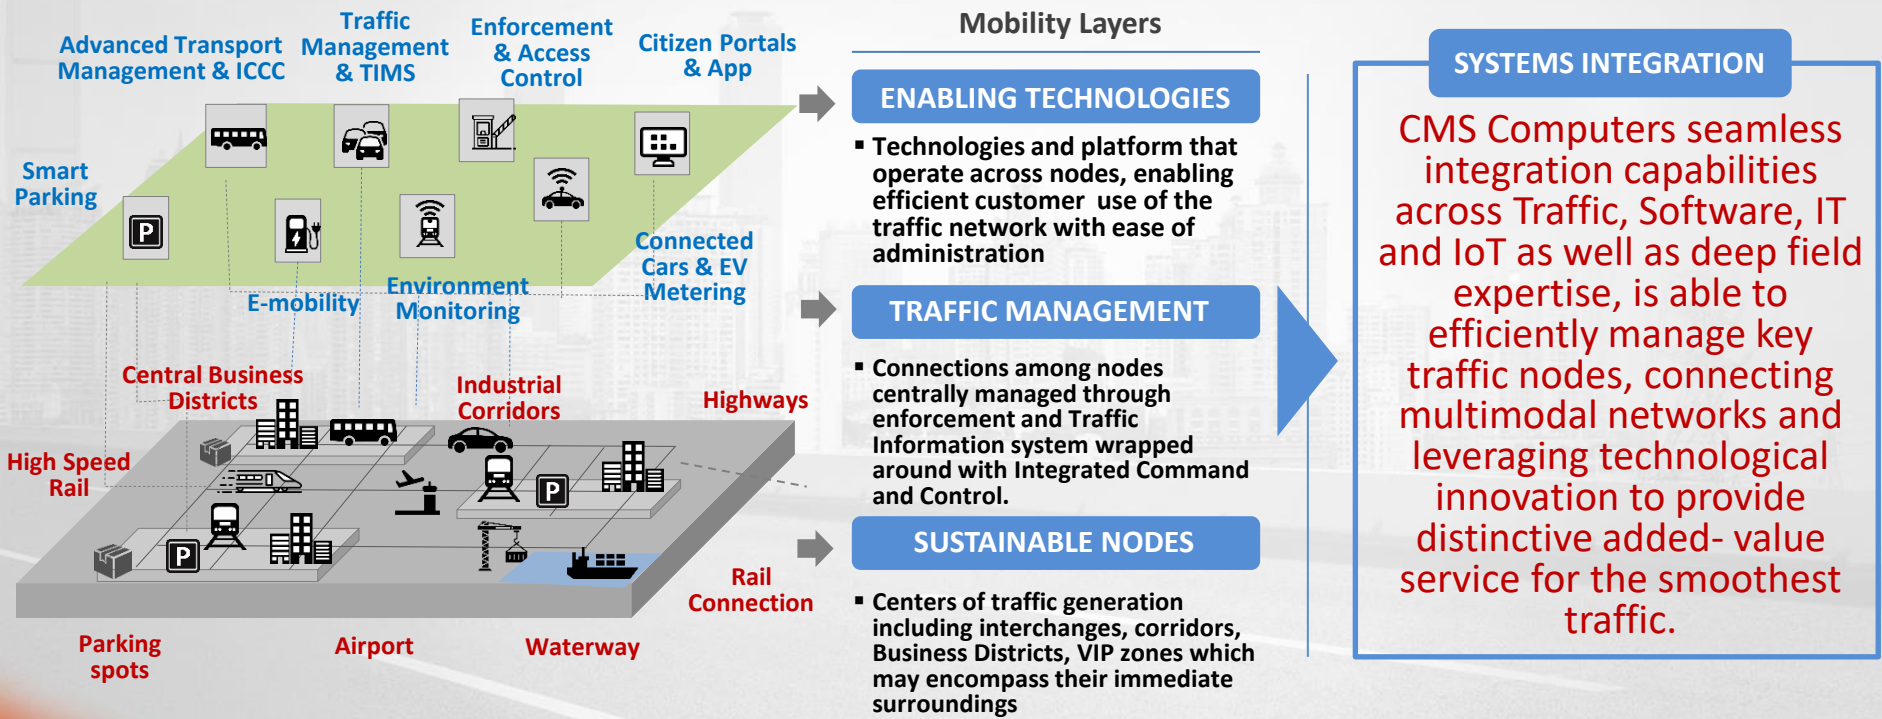

Muzaffarpur Smart City

- ICCC Application with Integrations
- Adaptive Traffic Control System
- RLVD & Enforcement System
- Variable Message Signs
- Emergency Call Box
- IP based Public Address System
- ERP, eGov & Web Portal

Engineering + IoT + Software + IT Infra

CMS has the capability for Seamless Integration across the Ecosystem

CMS Point of View: ICCC

- **ICCC** acts as the “**Nerve Centre**” for operations management, capable of processing complex and large pool of data.
- Initially aimed at **controlling and monitoring** water, power supply, sanitation, traffic movement, integrated building management, city connectivity and Internet infrastructure, these centres have since evolved to monitor various other parameters.
 - Environment Sensors
 - Crime and Criminal Tracking Networks and Systems
 - CCTV Surveillance & Video Analytics Systems
 - eGovernance Solutions And Asset Management Systems
- ICCC is used for increasing the **Situational Awareness** by providing insights using data for civic officials across urban functions through deployment of sensors across the city.
- ICCC **Standardizes Response Protocol** at city level by defining standard processes for recurring events, issues, incidents, etc.
- ICCC **Enables Collaboration** across multiple departments within and outside urban local bodies and other government and semi-government organizations.
- **Institutionalizes data driven** decision making for regular operations and during crisis situation across levels of city functionaries – right from operators to city administrators.

Multi-industry ICCO/IoT/ device management platform

1

Vendor Agnostic device and data connectivity
Cross Platform and Cross Database architecture

2

Edge computing capabilities to extend the power of the cloud to mobile and IoT devices

3

Standard Communication protocols to build the device drivers for any devices to be onboarded

4

5

Multi-cloud management and enables end-user to exchange between different platforms.

6

Deployment Flexibility – On Premises, On Cloud and Hybrid

7

Integration with other enterprise systems for exposing data integration.

8

API and data management for B2C and B2B business application.

ICCC provides a rich set of features for managing / monitoring device networks, processing and visualizing collected data and integrating with other enterprise systems using open-source APIs.

ICCC Key Components

Command & Control Center

- Real-time Dashboards
- Video Analytics
- Standard Operating Procedures
- Alerts & Notifications

- AI based Recommendations
- Orchestration and Integration of multiple data sources
- Bi-directional communication
- Business Intelligence

Field Officer

- Real-time interactions with command center
- Incident handling
- Workflows & Standard Operating Procedures

- Collaborate
- Receive Alerts & Notifications
- Ground situation report
- Collect Data offline and online

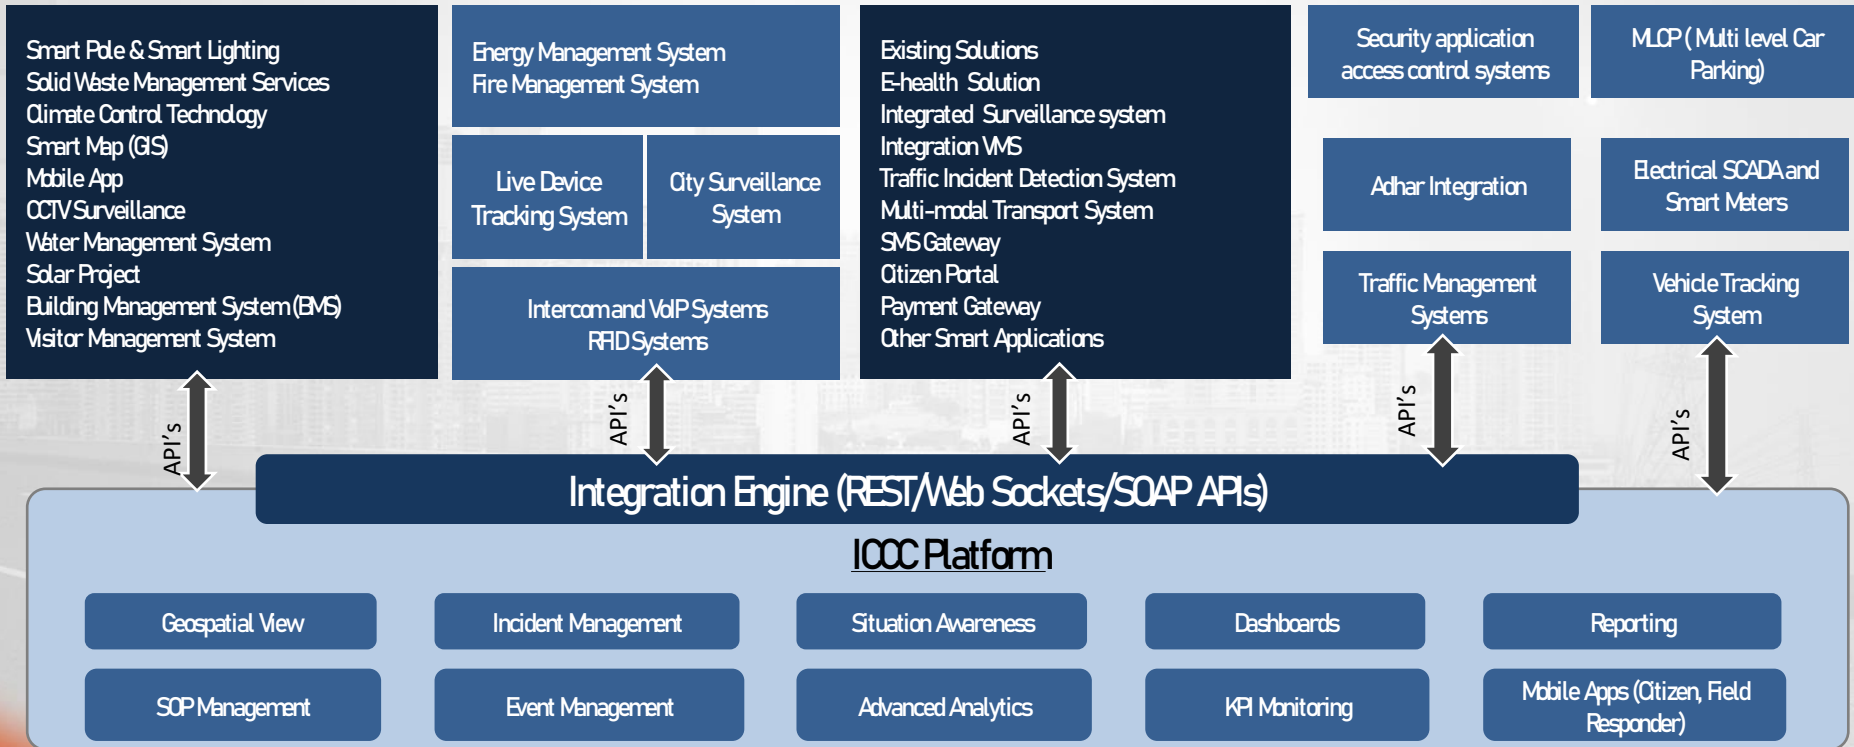

Citizens

- Emergency helplines
- Complaints and grievances
- Utilities payment
- City Announcements
- News and Events

- City Tourist Guides
- Smart Solutions
- Government Services
- Offers and Deals
- Notifications

ICCC Platform – Integration Architecture

What's Next for Command Control Centers?

- **More Integration:** Leverage information across departments, service delivery engines.
- **Anticipate Problems:** Build a Data Aggregation Layer and building a Predictive Cognitive model.
- **Co-ordinate Resources:** Event Correlations and linking KPI's for rapid coordinated response.
- **Service Management Focus:** Integration of Multi channel service desks, Voice & Chat bots leveraging Contextual technologies and Microservices.
- **Leveraging Cloud:** Build a Hybrid Cloud infrastructure connecting Corridors, Intersections and Highways across cities and suburbs.
- **Security integrated into the architecture:** IT & OT security management built from design phase.
