Our Portfolio

Integration of SOC/NOC

Organizational level

Collaborating, cross-correlating and identify common patterns from NOC/SOC respective tools would result in forming one unified set of defenders

System level

Service level agreements, standard operating procedures, integrating processes and structures in place would allow operators to communicate and coordinate seamlessly

Asset level

Utilizing a common information aggregator that collects all the data required and distributes it using integrated tools and dashboards

How to Approach SOC/NOC Integration

STEP 01

Contain the Diversity of Toolkits

STEP 02

Balance IT versus Security

STEP 03

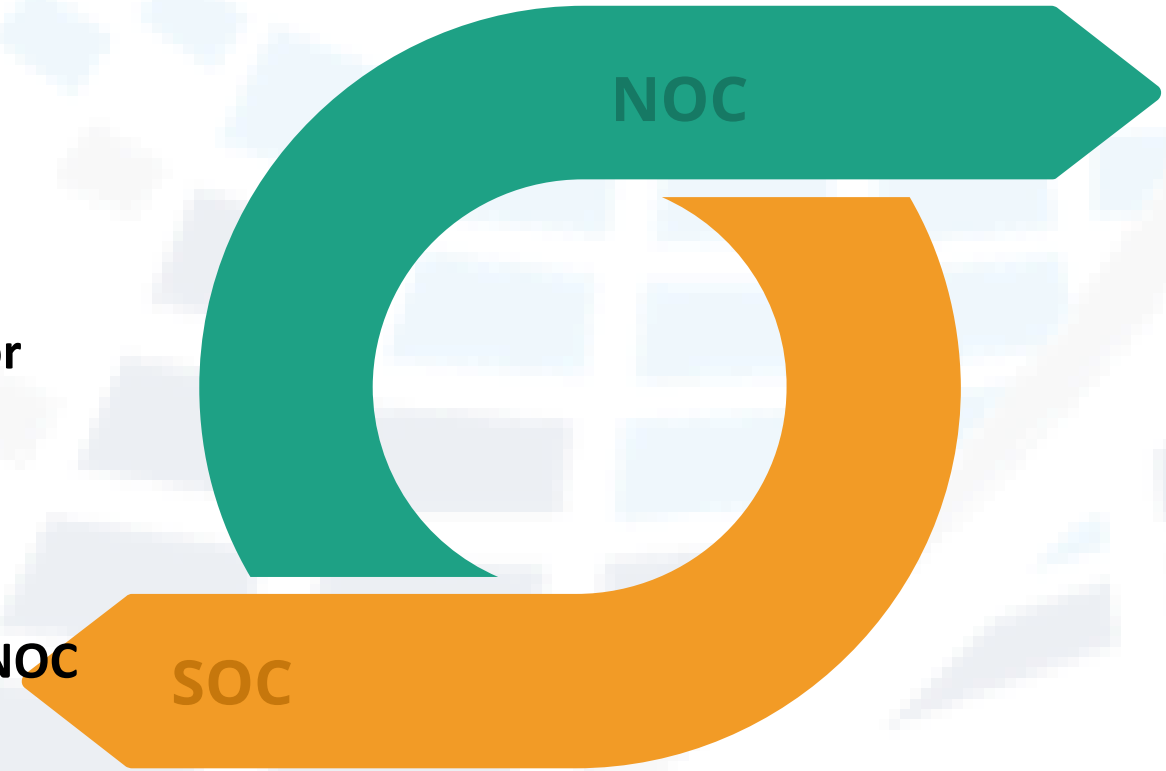
Right-Size Each Team

Where the SOC and NOC have Natural Overlap

-Process the alerts from log sources

- Utilize a ticketing system for inter- and intra-team collaboration

-Set and enforce policies in NOC and SOC areas



-Security events can result in network performance issues

- Security Events cause availability issues

- Incident response plans to investigate alerts and resolve threats.

SOC/NOC integration benefits

Better security

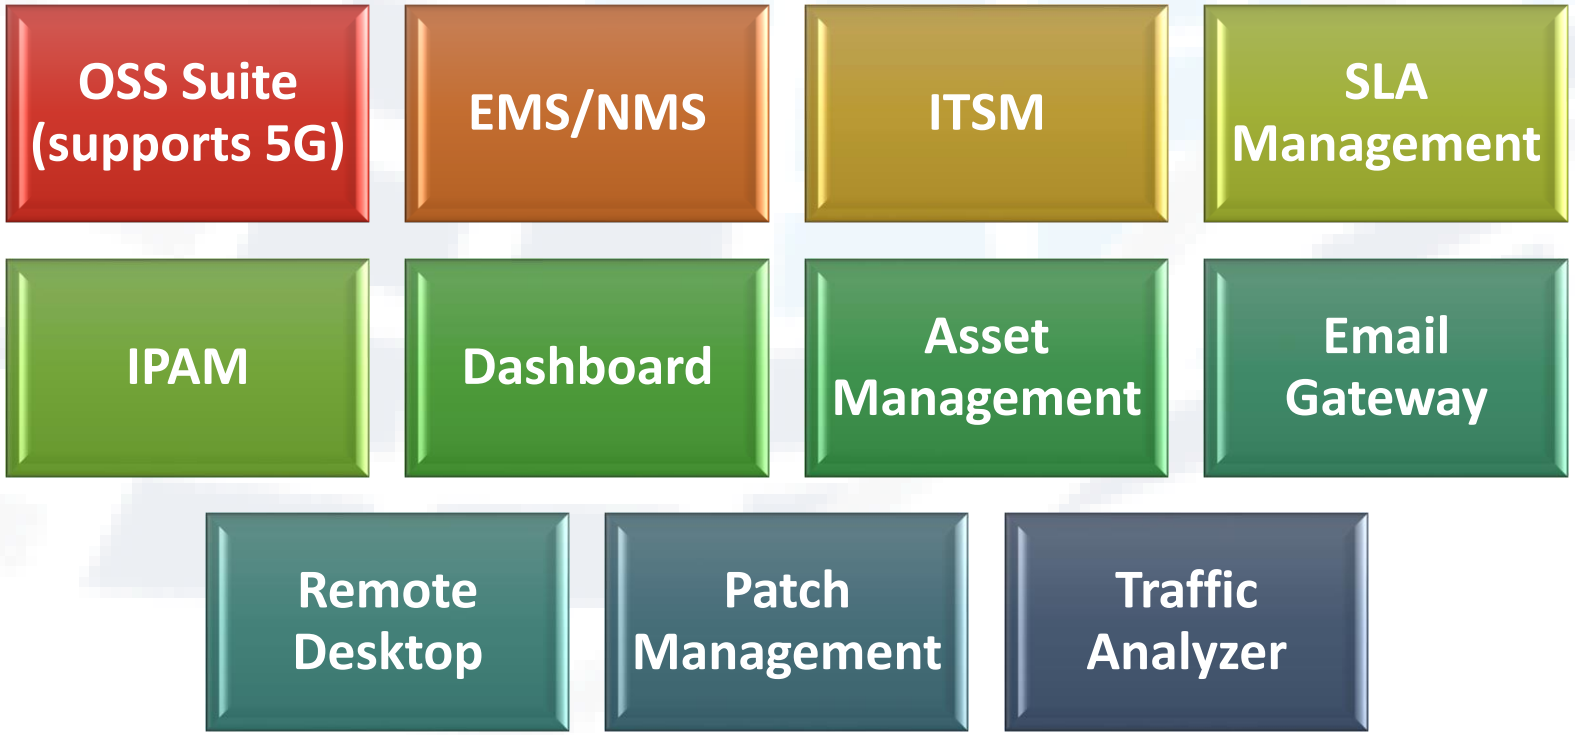
Improved operational and cost efficiency

Improved network performance

Improved response time

Network Operations Center

Network Monitoring is an end-to-end IT performance management and monitoring suite for today's heterogeneous, hybrid and scale-out infrastructures. While specialized monitoring tools provide deep-dive visibility into each tier. It is a general practitioner for your IT infrastructure - i.e., it provides the unified console from where administrators can detect and resolve a majority of IT issues .



USPs of Network Operations Center

1. All-in-one solution for the monitoring & management
2. Real-time performance monitoring
3. Predictive Analysis & Capacity Planning
4. Monitor and optimize your data center across physical, virtual, and cloud environments.
5. Save time and resources
6. Overall Operational cost optimization

Security Operations Center

Security Applications provides complete server protection; Full application control enables micro segmentation, administrator privilege de-escalation, patch mitigation, and protection against zero day threats in today's heterogeneous private/public cloud data centers

USPs of Security Operations Center

1. Centralized logging of the infrastructure

2. Integrated Asset Management

3. Able to secure their infrastructure

4. Able to manage the secure access of the networks and other application

5. Able to manage the compliance as per the govt. policy

6. Critical security event Management and alerting

UC & Collaboration Solutions

TechBridge
Making the World Smarter

Vidoly – Software Video Collaboration Tool

HD Video Conference

Software Based

WebRTC

No Client software required

True Collaboration

Screen Sharing, Annotation, Whiteboarding, Hand Raise, File Sharing

Advanced Features

AI based Transcription, Recording, Advanced Security, Easy Integration

Complete IPPBX and Contact Center

Monitoring Dashboard | Ring Group | Call Recording

Call Accounting & Management | CDS Statistics

Supported Clients(SoftPhones, VoIP Phones, Zoiper, etc)

USPs of Unified Communication & Collaboration

1. Streamline IT Operations
2. Improved Customer Service
3. Increase efficiency with AI
4. Reduce Costs
5. Strengthen IT Security
6. Increase Organizational Agility
