Safe and Smart City

Fiber Optic Cabling: Fiber optics provide high-speed data transmission and are crucial for connecting surveillance cameras and sensors over long distances.

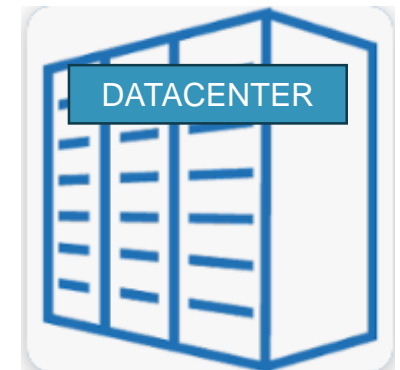

Ethernet Cabling: Ethernet cables are used for connecting various devices, such as IP cameras, access control systems, and data servers.

Power Over Ethernet (PoE): PoE technology allows both data and power to be delivered over Ethernet cables, reducing the need for separate power cables.

Datacenter: Data centers are the heart of the surveillance based safe city projects. The data center acts as a warehouse for the data collected from the surveillance sensor.

COMMRAX Network Solutions

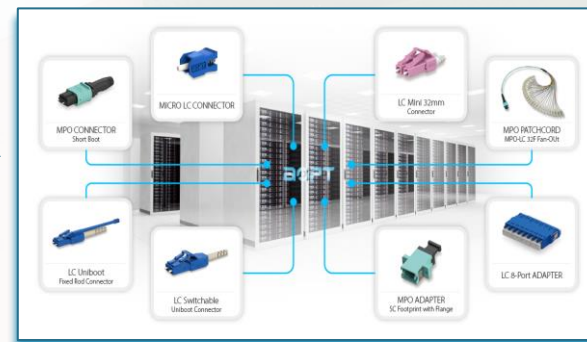

SCS Copper

SCS Fiber

Solutions

Datacenter

Network Enclosure

Superior Usability

Copper

Completed Offer Range

Cat 7, 6A, 6 Solution;
Unshielded, Shielded; Patch Cords; Shuttered
Design; Angled Jack

Fiber

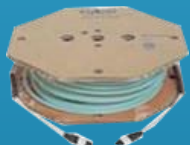

End to End Connectivity

OS2, OM3, OM4 Solution
Indoor and Outdoor Solution
Campus wide Network Solution
HD Panels Solution

Datacenter Focus on 40/100G Transmissions

40/100G Ready MPO Solution;
Pre-terminated OM4, OM3 & OS2 Trunk Cables;
High-density Fiber Enclosures

Enclosure

Network Enclosure

Wall Mount, Floor Mount
Datacenter Racks, Open Racks, Closed Racks

Complete Peace of Mind

Training & Warranties

1. Comprehensive SCS Training

- Basic Training: 1 Day
- Core Training: 2 Days
- Refresh Training: 1 Day

2. Product & System Warranty

Environment in Focus

- Reduce the environmental impact of our products throughout their life-cycle
Eco-design and Eco-production

- Compliant with RoHS, REACH
European directives
