Key Industries Served

Safe City

Implementing a surveillance solution across the city helps safeguard essential infrastructure, including roads, railways and waterways. This is complemented by a 'Central Management System' for detailed analytics and record-keeping.

Health Care

We implement advanced measures to protect patient privacy, secure medical records, and maintain a safe environment.

Smart Traffic

Optimizing traffic management & safety, we utilize intelligent technologies to enhance traffic flow and reduce congestion.

Industrial

For industrial sectors, our security solutions are designed to mitigate risks and protect critical infrastructure

Law Enforcement

Empowering law enforcement agencies, our cutting-edge solutions enhance public safety and optimize crime prevention efforts.

Banking

Ensuring the utmost security for financial institutions, our solutions safeguard the integrity of transactions and help protect sensitive data.

Hospitality

Elevate guest safety and peace of mind with our comprehensive security solutions tailored for the hospitality industry.

Retail

From preventing theft to ensuring a safe shopping environment, we deploy integrated security measures to safeguard retail businesses.

Campus

From access control to video surveillance, we prioritize the well-being of students and staff, fostering a secure educational ecosystem.

➔ One-Stop Security Services & Solutions

➤ CP PLUS AI Solution

Application

CP PLUS.AI
Powered By sparkcognition

Powerful AI-driven analytics, producing detailed & actionable insights

Features

- AI Powered Video Monitoring
- Video Analytics & Edge AI Box
- Intruder Detection & Prevention
- Security & Process Automation
- Optimized Hardware Offering

➤ CP PLUS Cloud Storage

Delivering cutting-edge, secure, and cost-effective surveillance, powered by our cloud solution - hosted right here in India.

24x7 Playback Availability

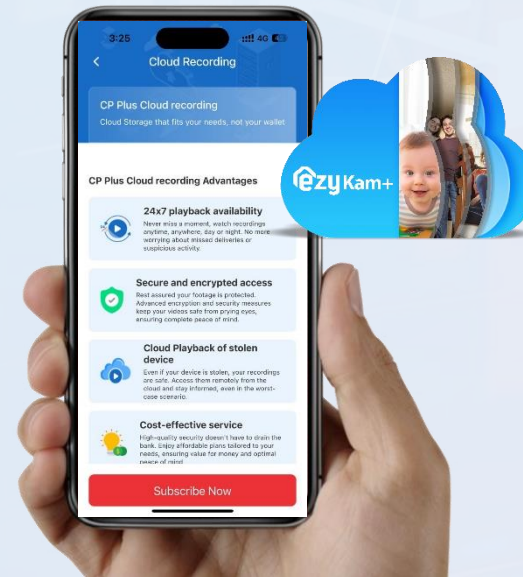

Cost-effective Service

Cloud Playback of Stolen Device

Secured Data Storage

➔ Advanced Manufacturing and Research & Development Capabilities

3rd Largest CCTV manufacturing facility in the world Largest Outside China

Driving Growth With A Workforce of **3000+** Employees at the Plant

Multiple High-speed world's latest **SMT** lines

Manufacturing Capacity 2 Million Per Month

Enhancement to cater to the expected growth in local Demand and possible Export Opportunities.

Backward Integration & Manufacturing for Housing, Cables, Adapters & other parts

Lens & Sensor Localization

Comprehensive Product Portfolio : Across Verticals

Smart Home IoT Cloud Cameras

Full-Color Cameras, Active Deterrent, Floodlight Cameras

HD Analog Solutions

Dual light Cameras, Built-In Mic, Higher Resolution, DVRs

Intelligent Network Cameras

Bullet, Dome, PTZ Cameras, Long-Range IR Cameras, SMD Cameras

4G Cameras

Wireless, High-Performance 4G Outdoor Cameras, solar Powered Cameras

Thermal Cameras and long-range IR cameras

Smoke/ Fire/Motion Detection, Cold/Hot Spot Tracking, Stainless Steel Housing, IP68

AI-Powered Cameras & Solution

AI, ANPR, FR, People Counting, Heat map

Network Video Recorders

Upto 256Ch. - Upto 24 SATA, RAID Supported, Power Redundancy, IVS Supported

Mobile/ Onboard Surveillance

Mobile NVR/DVR Solution, Advanced AI-System Supported

Time-Attendance & Biometric Products

Fingerprint and face recognition biometric solution powered by AMS (workforce management tool)

Integrated Central Command & Control Solution

Video Wall solution, Storage solutions, EVMS Pro - Integrated VMS platform, Joystick

Interactive Displays

Upto 86" Interactive Display, OPS Support, Android Platform, Feature rich whiteboard

Embedded Video Storage

Available in 16/24/48 Bays
64-bit High-performance multi-core processor

Video Door Phones

Video Door phones, Wi-Fi Doorbells

Dashcams

CarKam Front & Rear Camera, CarKam Front, Rear & Cabin Camera, CarKam GPS

Body-Worn Cameras (BWC)

Online & offline BWC, Support upto 512GB

PoE Switches and other Accessories & Products

Monitors, Power Supplies, Hard Disks, Cabling, Racks, Electromagnetic Locks, Housing, IR-illuminators

Introducing NEXIVUE Security Solutions

Next-Gen Innovations For A Future-Ready World

Launched
February 2026

Market Strategy

Designed for rural and mass-market segments, offering affordability without sacrificing quality while preserving CP PLUS's premium positioning.

Key Innovation

Multi-brand architecture maximizes market share across diverse price points following the STQC brands.

DuoVision Series

2MP to 8MP cameras with dual light technology, IR range up to 60m, & advanced encoding

NVR's

9 to 64 channel NVRs with up to 8 SATA support and 4K recording capability

Smart Features

Built-in mic & speaker, motorized lens options, IP67 weatherproofing, and PoE support

Key Govt. Credentials!!

→ SMART & SAFE CITY

- Delhi Community Surveillance **(1.44 Lac Cameras)**
- Vishwas - Gujarat City Surveillance **(5K+ IP Cameras)**.
- Prayagraj Smart City **(1.2k+ IP Cameras)**.
- Daman & Diu Safe City.

- Jagannath Temple: Orissa (.....)

→ RAILWAYS

Already in use at all railway zones catering different applications and Coach Factories for installation in new designed coaches.

SAFE CITY SURVEILLANCE & INTELLIGENT MOBILITY

OUR APPROACH

Artificial Intelligent based Solution

With deep learning Algorithm

GENERIC USE CASES

AI Video Analytics in Modern Surveillance

FACE RECOGNITION

The system will recognize the human face appearing in the defined area.

Applications

- All Entry &

Bullet & Dome

ADVANCED PERIMETER INTRUSION DETECTION

Challenges

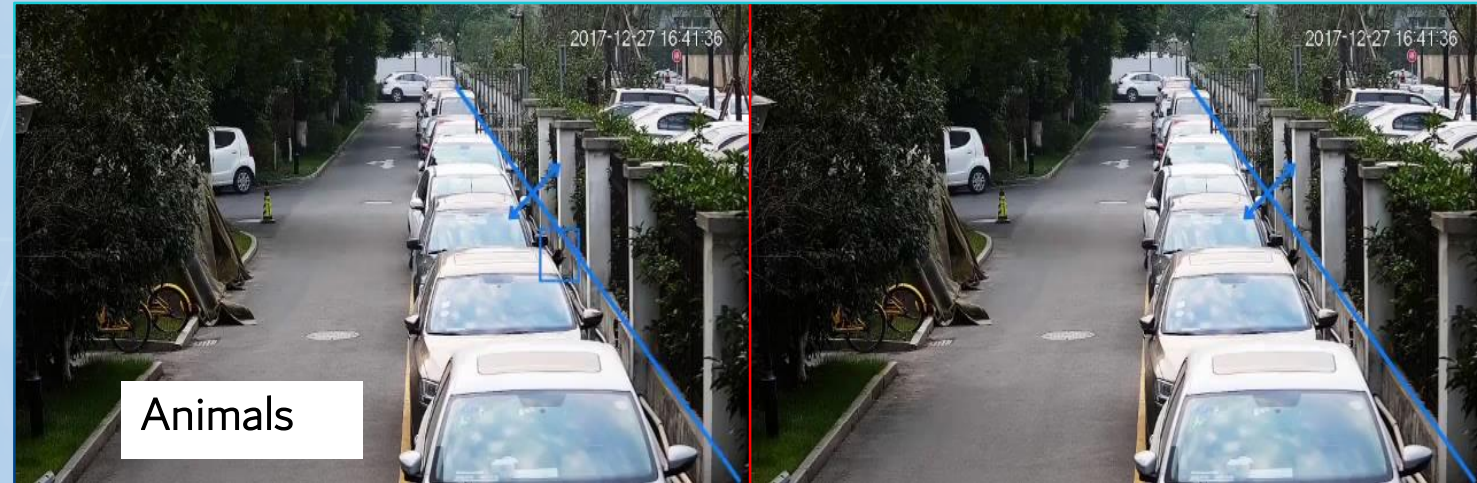

Intrusion from perimeter

Too many false alarm

Accurate Detection and Alarm

False alarm rate: <2%, Accuracy rate: 95%~99%

Animals

Intrusion Detection:

- Active Deterrence can deter intruders, Easy expansion with optional Siren to realize Active Deterrence

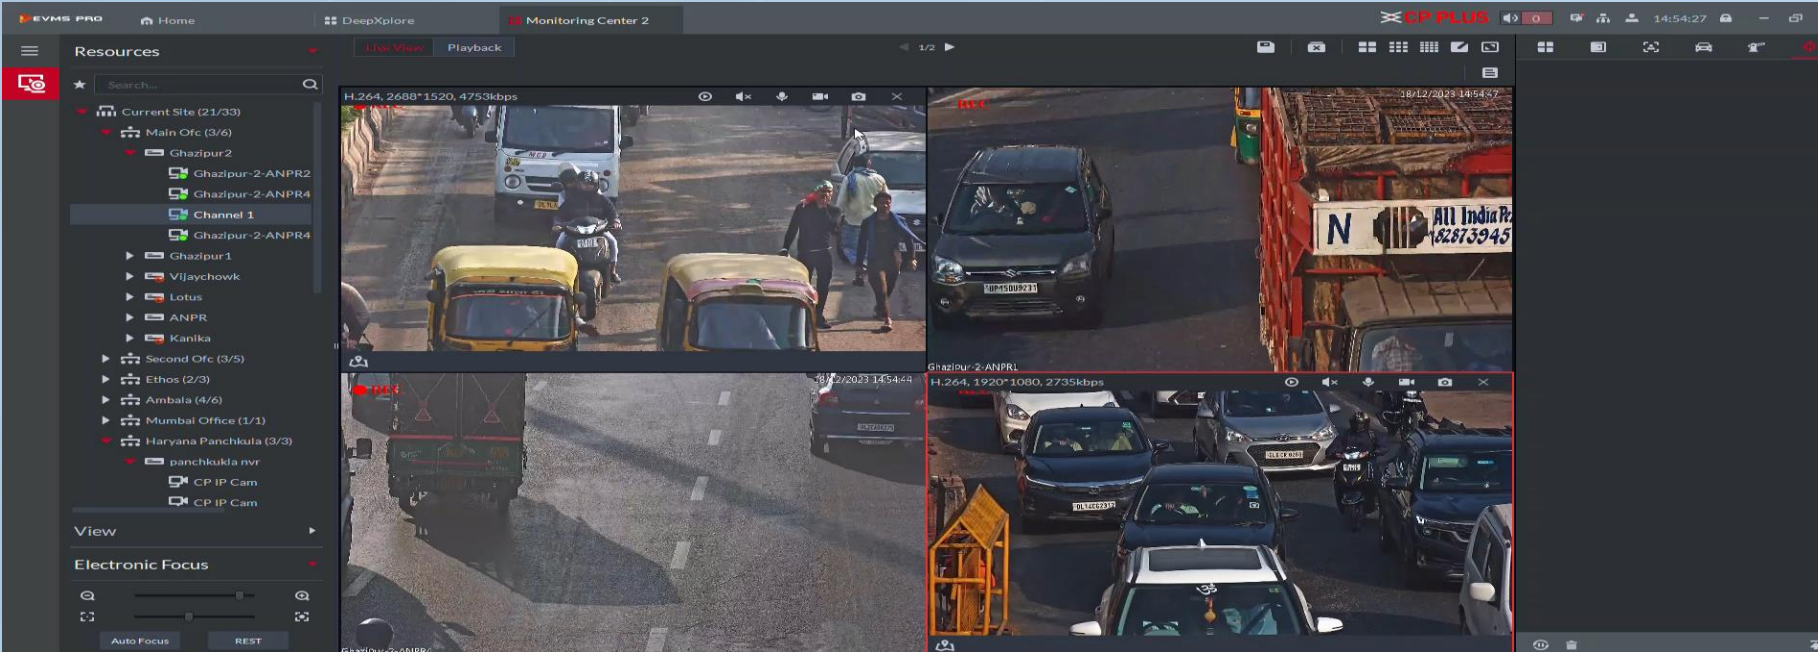

Reduce Labor Costs:

- Intelligent algorithm improves accuracy and reduces repeated confirmation by security personnel.

IP Camera

ANPR : AUTOMATIC NUMBER PLATE RECOGNITION

CP-UNC-TT41L3-VMD-Q

- 4MP IR AI Enforcement Camera
- 1/1.8" 4MP starlight CMOS sensor (1.411 cm)
- H.265 and H.264 dual codec.
- Maximum Resolution: 2688 × 1520@25/30fps.
- Built-in 10mm~50mm lens.
- The maximum illumination¹⁷

Boom Barrier & ANPR Integration

Car approaches

Camera recognize license plate -> register to management system

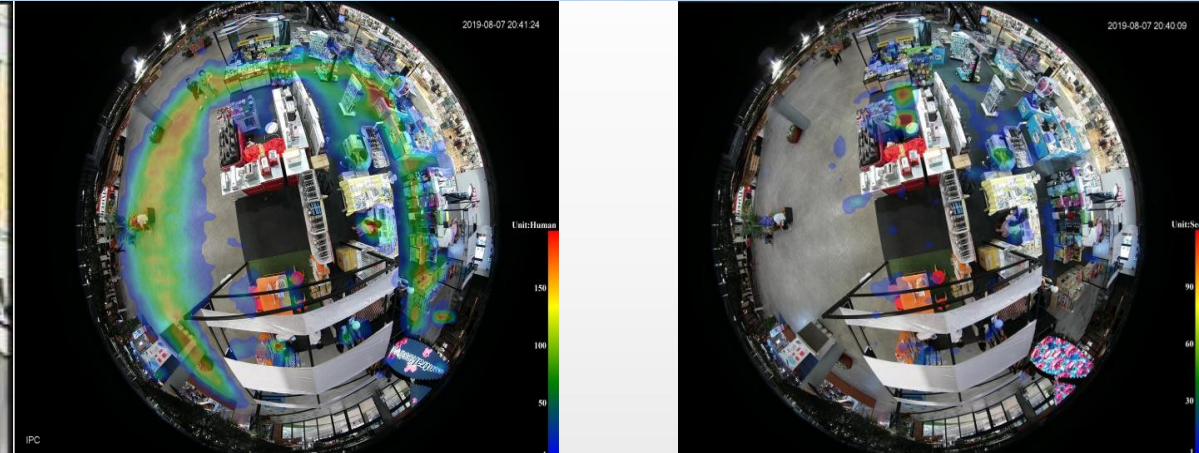

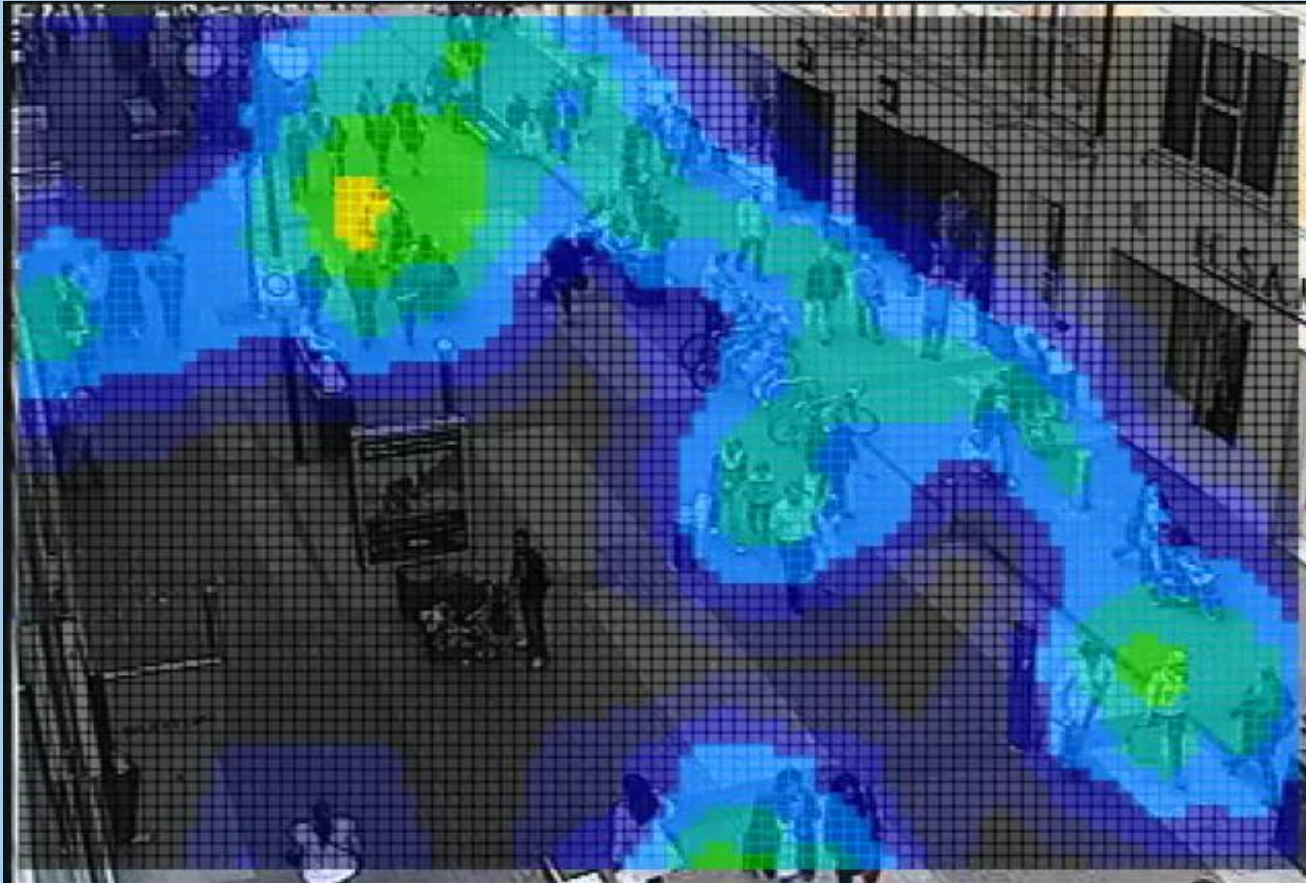

Barrier opens automatically

Entrance / Exit **BACK**

HEAT MAP – CROWD DENSITY

The system measures crowd density statistics within the set time and presents the space with different colors. Color level is divided into red, orange, yellow, green and blue (Level of Crowd)

Applications

- Optimizing workflows based on activity levels

Fish-eye
Cameras

LEFT OBJECT

The system will trigger an alarm when an object is left unattended over a predefined period.

Applications

- Ensuring correct handling of materials.
- In case someone leaves a malicious suspicious objects, it will raise / notify the authorities.

UNAUTHORIZED ACCESS

The system will trigger an alarm when an object enters and/or exits a defined area.

Reference Use case Videoclip

Application :

Preventive trigger of alarm/notification of Service area trespassing.

Full HD IP CAMERAS

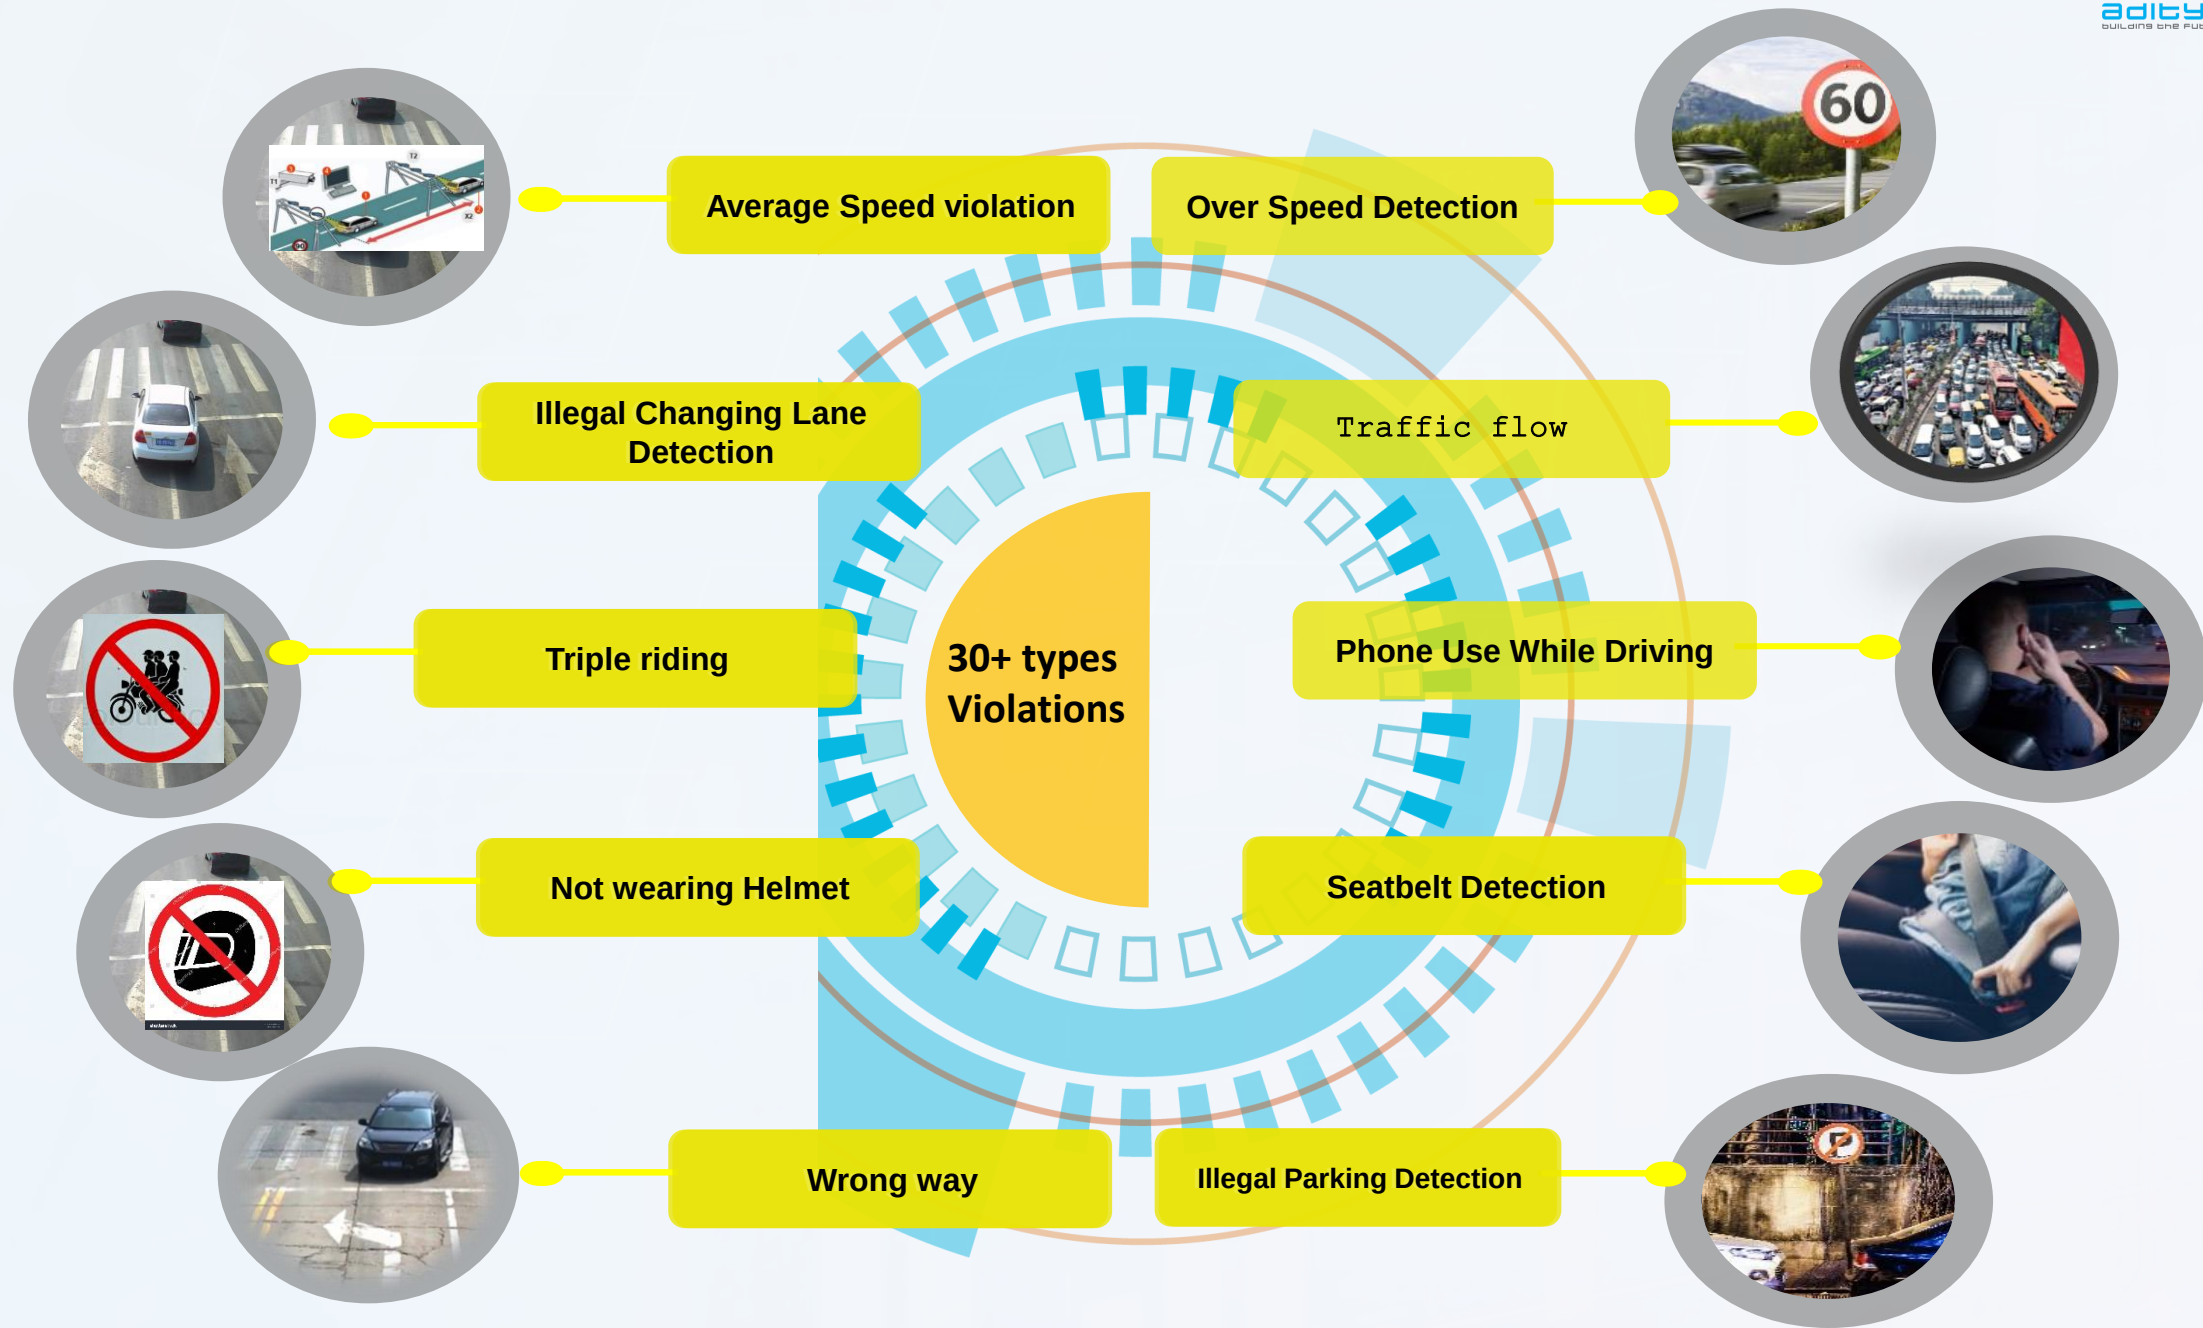

TRAFFIC USE CASES

AI Video Analytics in Modern Surveillance

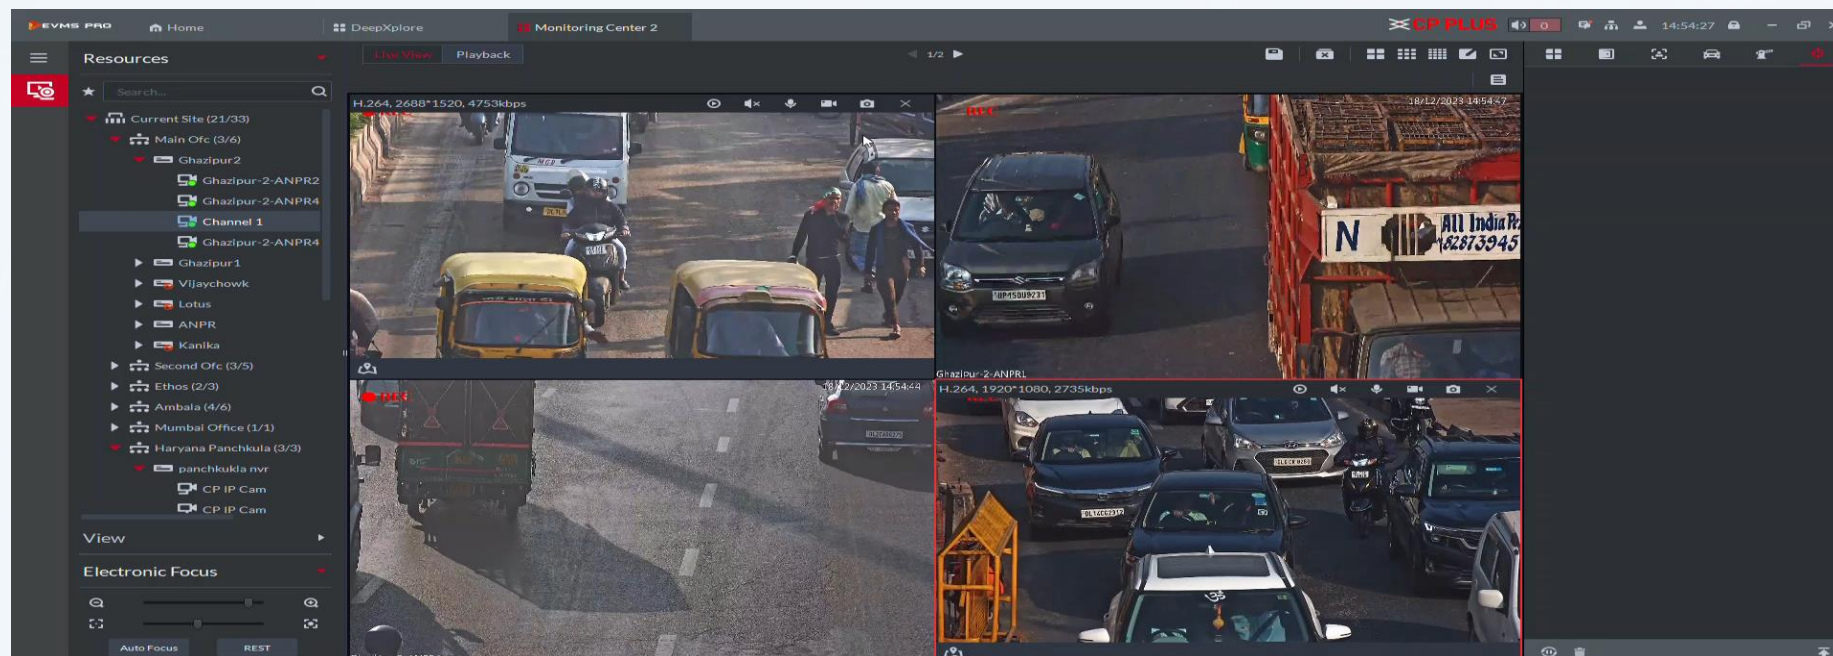

PRODUCT DESCRIPTION	IMAGE	SUPPORTED ITMS ANALYTICS
3 MP All-in-one IR AI Enforcement Camera - Global Shutter		ANPR (Cars & Bikes), Wrong direction detection, Wrong lane driving detection, Seat Belt Violation, Mobile Using, No helmet in two wheels, Triple riding in two wheels, Traffic flow detail
4 MP- Traffic Violation Detection Camera		ANPR (Cars & Bikes), Wrong direction detection, Stalled or stationary vehicle detection, Wrong lane driving detection, No helmet in two wheels, Triple riding in two wheels, Traffic flow detail
4 MP - 45X Zoom PTZ		Collision Detection, Stalled or stationary vehicle detection, Fog low visibility detection, Debris, Fall objects detection, Pedestrian crossing detection, Animal detection
CP-RAD		Speed Measurement Sensor
CP-LP83		Counting, Speed Measurement, Trip Length, Trip Time, ID

➔ Use Cases For Traffic Junctions and Highways

Use Case – ANPR

- 4MP IR AI Enforcement Camera
- 1/1.8" 4MP starlight CMOS sensor (1.411 cm)
- H.265 and H.264 dual codec.
- Maximum Resolution: 2688 × 1520@25/30fps.
- Built-in 10mm~50mm lens.
- The maximum illumination distance is 30 M.

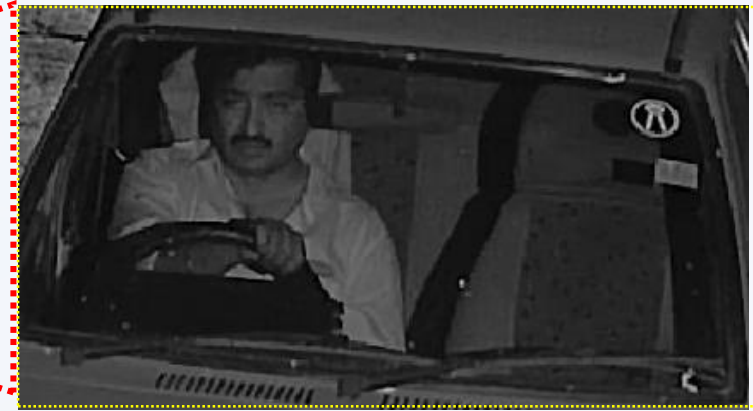

→ Urban Road | Not wearing Seat Belt

Not wearing Seat Belt

Scenario Business:

- Not wearing seat belt

Step:

- UNC capture & recognition
- Flash-light for seat-belt, phone using and face capture

→ Urban Road | Phone Call Violation

Driving with Phone call

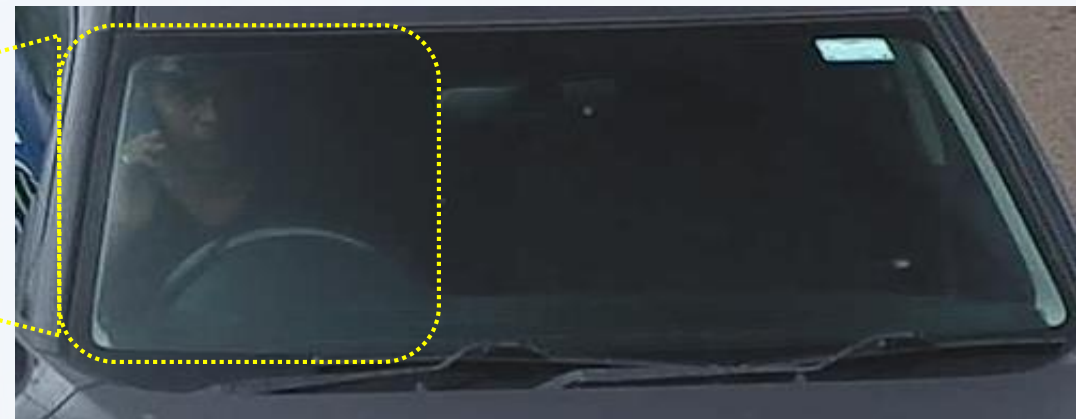

Scenario Business:

- Driving with phone call

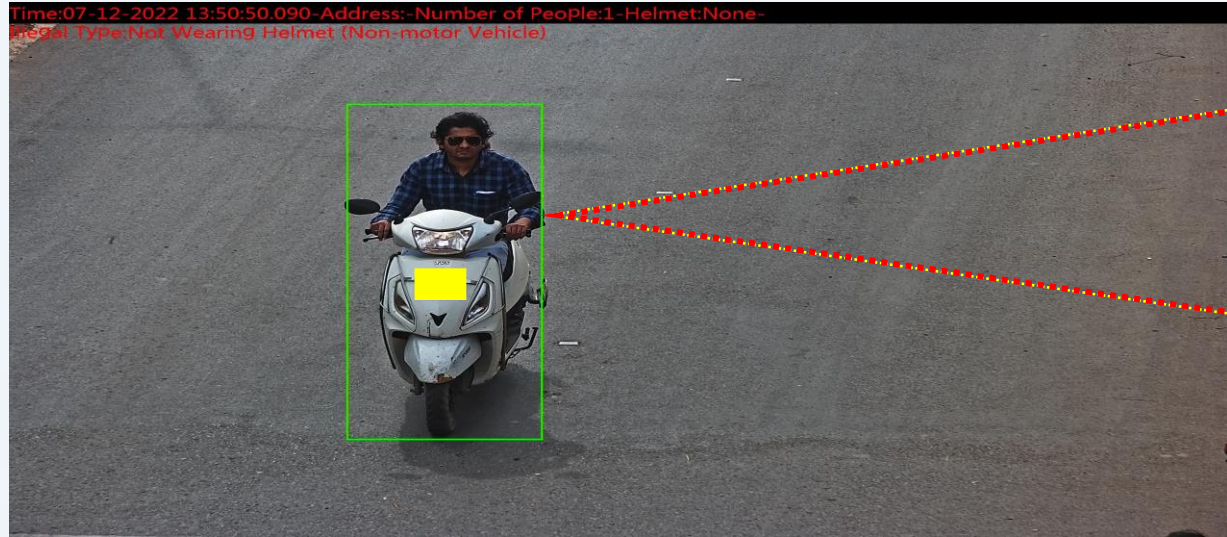

Step:

- UNC capture & recognition
- Flash light for seat-belt, phone using and face capture

→ Urban Road | Not wearing Helmet

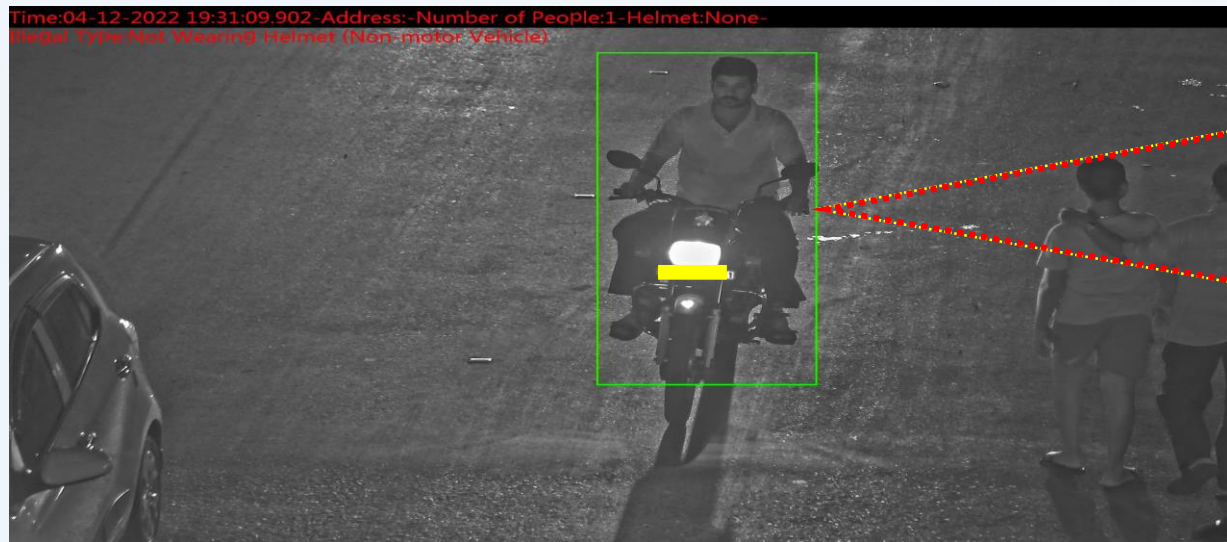

Scenario Business:

- Two Wheeler: Not wearing helmet

Step:

- UNC capture & recognition
- Strobe light for video fill light

EMERGENCY SMART POLE Solution

Concept Note On Women Safety

In recent years, India has witnessed an increased focus on women's safety due to rising concerns about incidents of harassment, assault, and violence against women in public spaces.

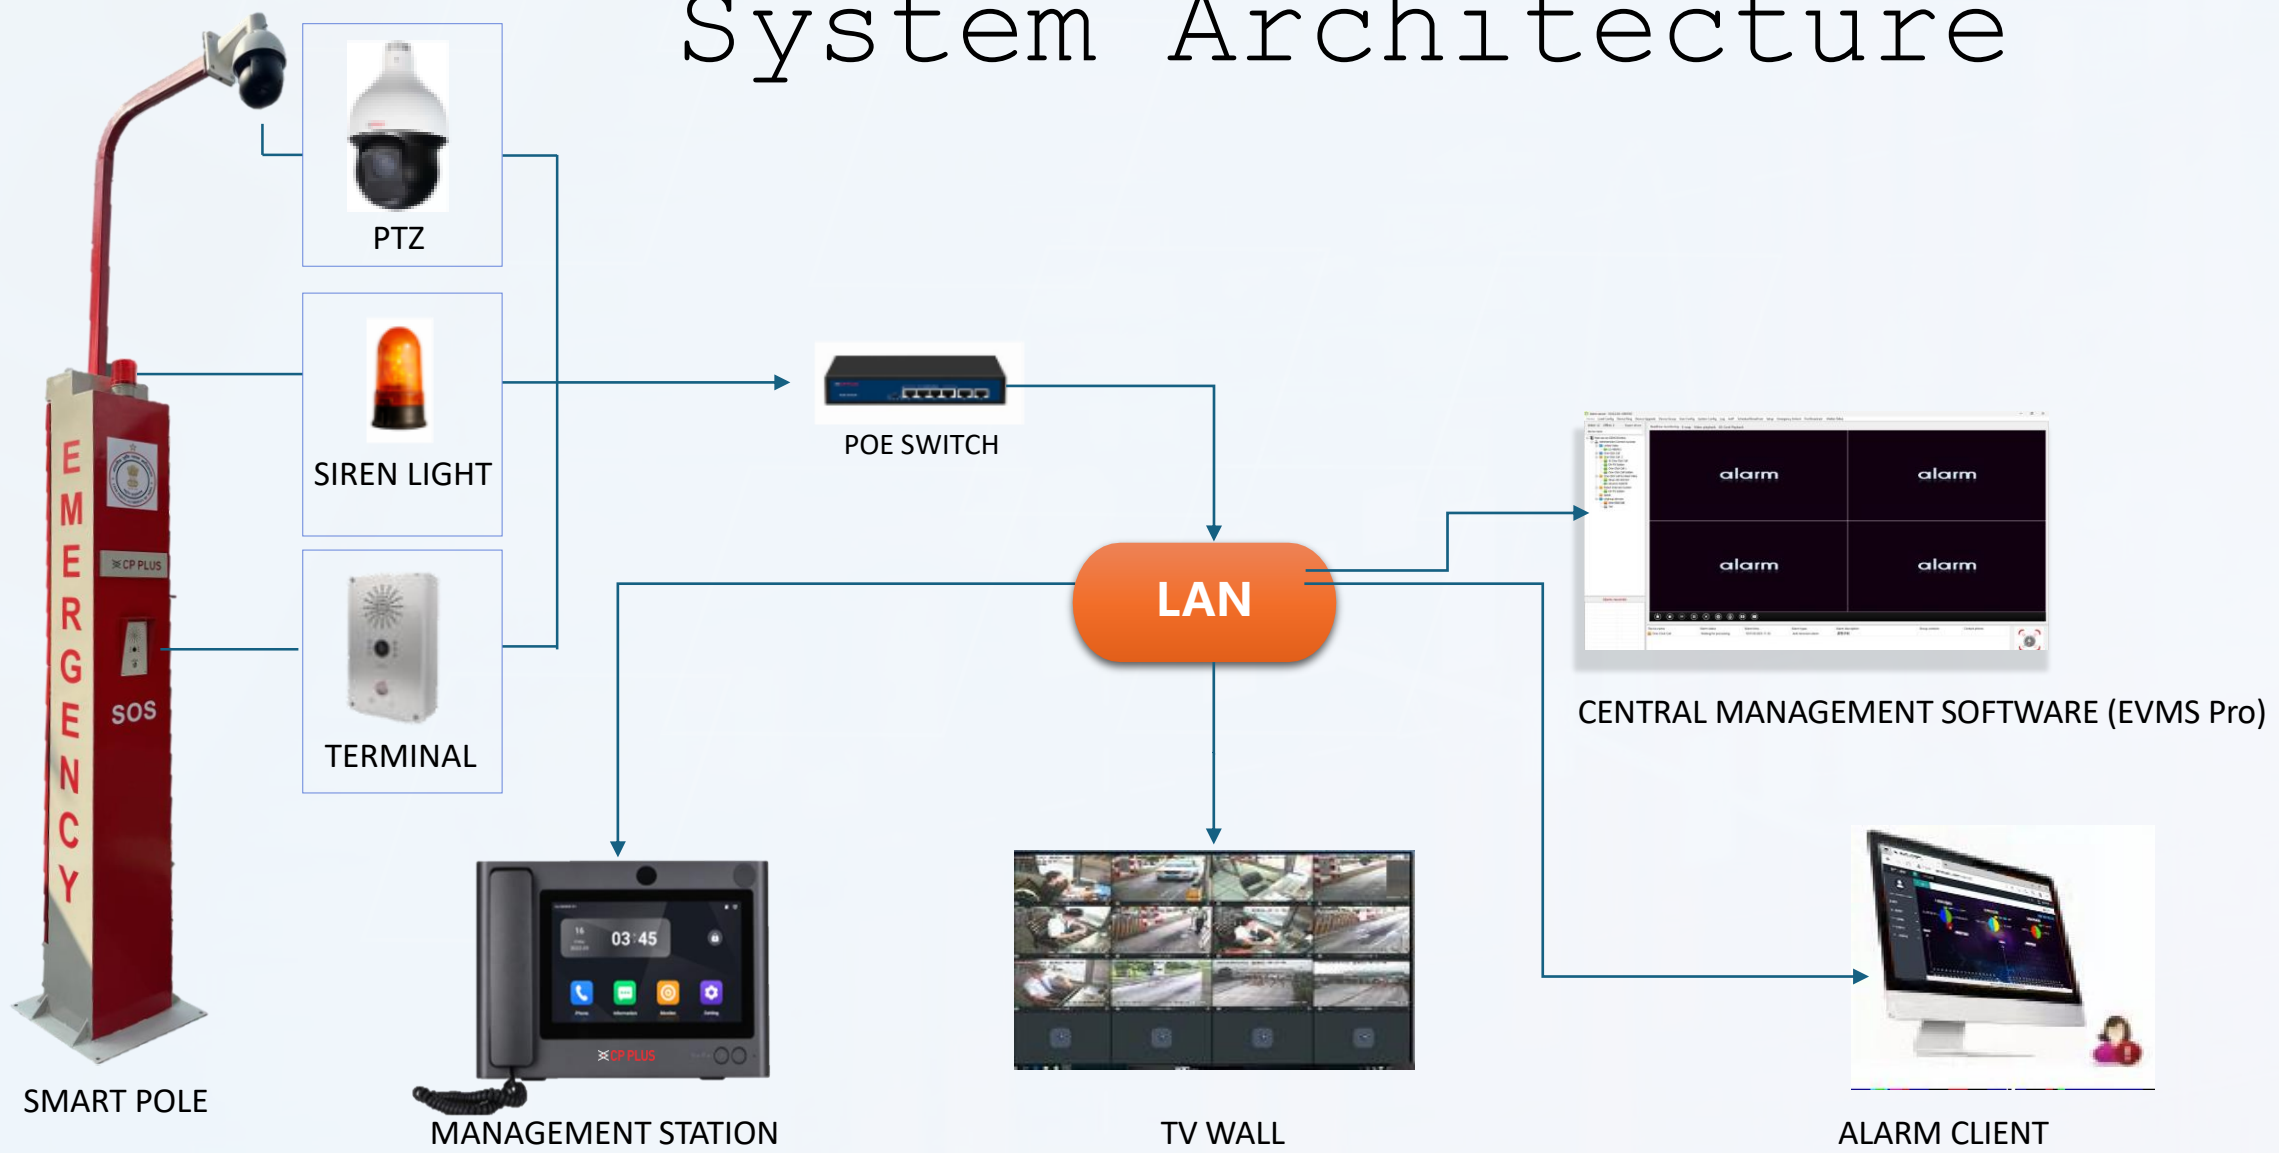

Numerous initiatives have been undertaken by the government, civil society organizations, and private entities to address these issues. One such innovative solution presented by CP PLUS is the implementation of Smart Poles equipped with emergency SOS button and CCTV cameras in various regions across India.

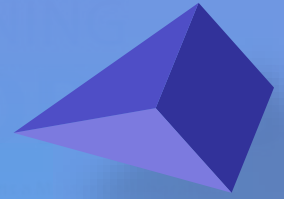

Emergency SoS Poles

Business Intelligence

.....

AIL - CP PLUS VMS – EVMS PRO INTRODUCTION

EVMS Pro is a video management system (VMS) that offers a wide range of benefits for businesses and organizations of all sizes.

Some of the key benefits of EVMS Pro include:

1

Comprehensive Management

EVMS Pro offers centralized management for various surveillance components, streamlining control over cameras, devices, & recordings.

2

Failover Redundancy

The failover feature ensures system reliability by seamlessly switching to backup servers during failures, minimizing downtime.

3

Multi-Site Support

It allows management and monitoring of multiple sites from a single interface, simplifying operations for distributed installations.

4

Remote Access

EVMS Pro facilitates remote access to live and recorded video, enabling efficient monitoring and management from anywhere.

5

Integration Capabilities

Integration with various third-party systems and devices enhances overall functionality and interoperability.

6

Centralized Alarms

The system aggregates alarms and events from different sources, providing a centralized view for better situational awareness.

7

Efficient Search and Retrieval

Advanced search options enable quick retrieval of specific video footage, improving investigation efficiency.

8

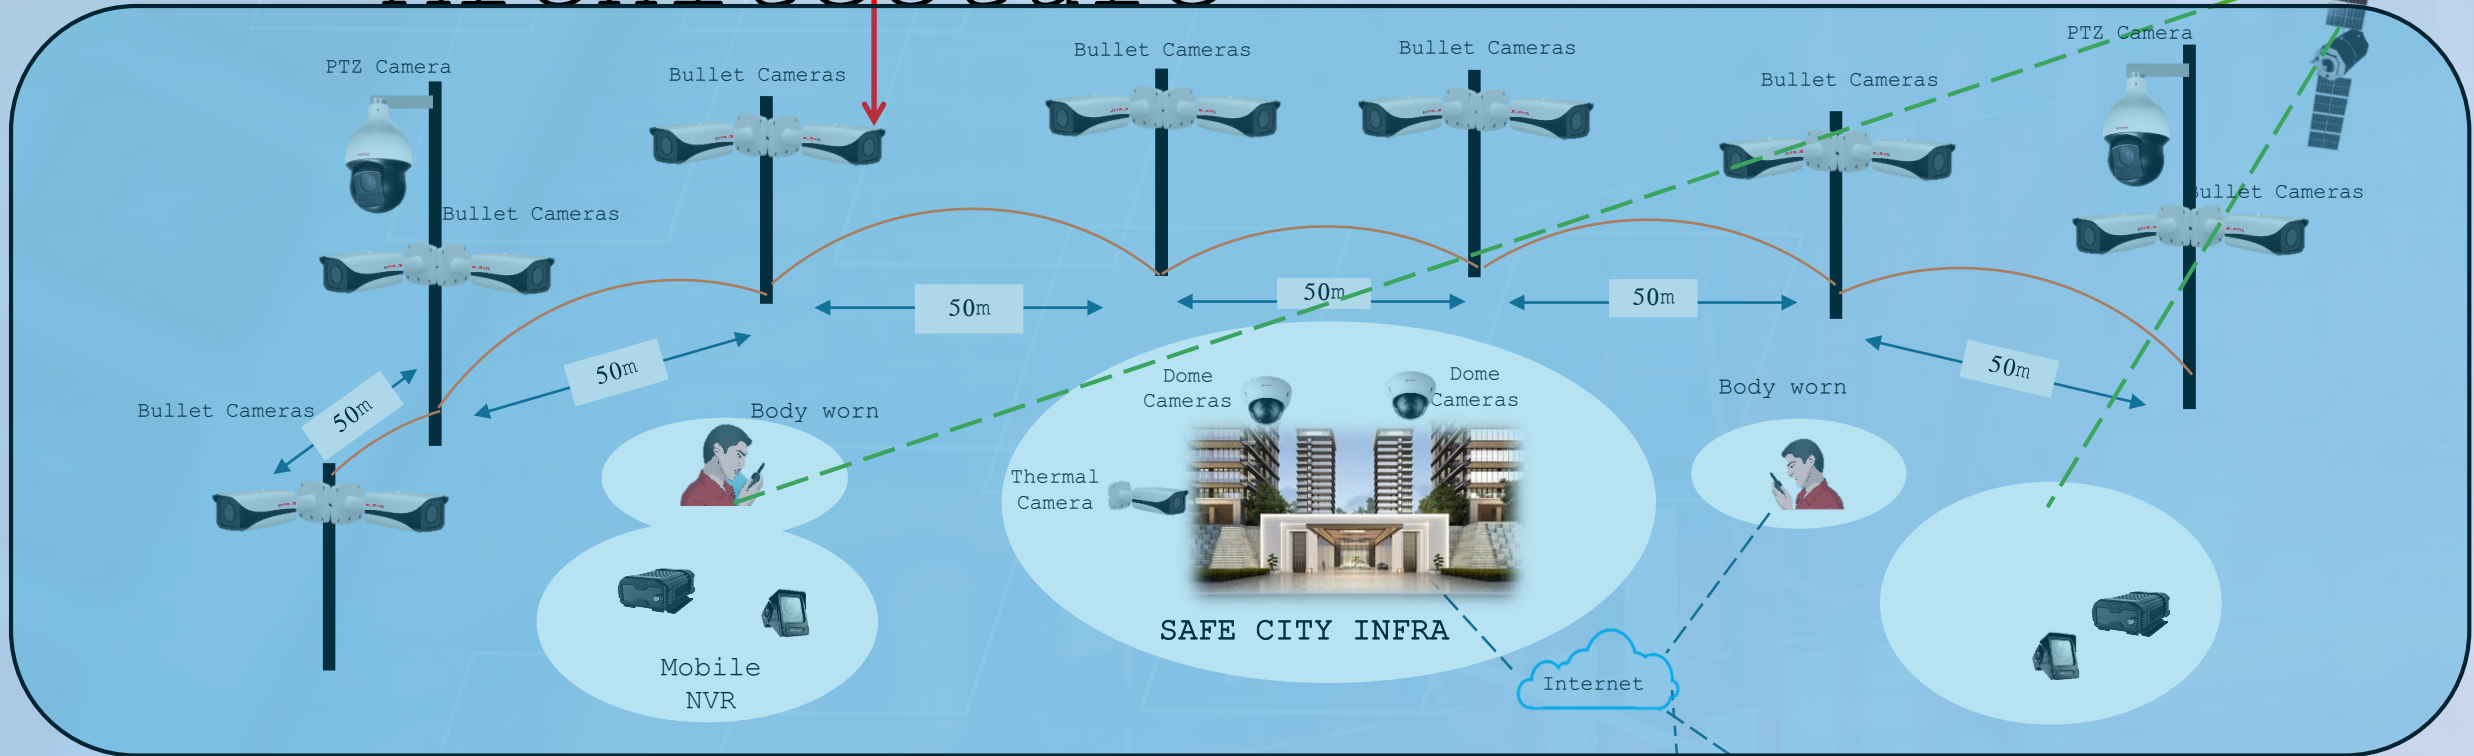

Advanced Analytics

EVMS Pro incorporates advanced analytics tools for efficient video analysis, enhancing security and operational insights.

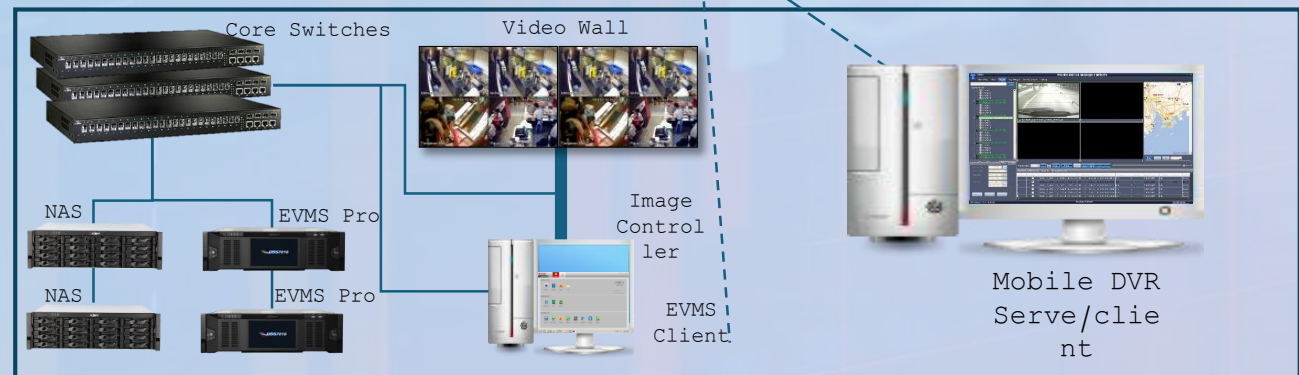

Single Platform Solution

Arch

Monitoring through HMS

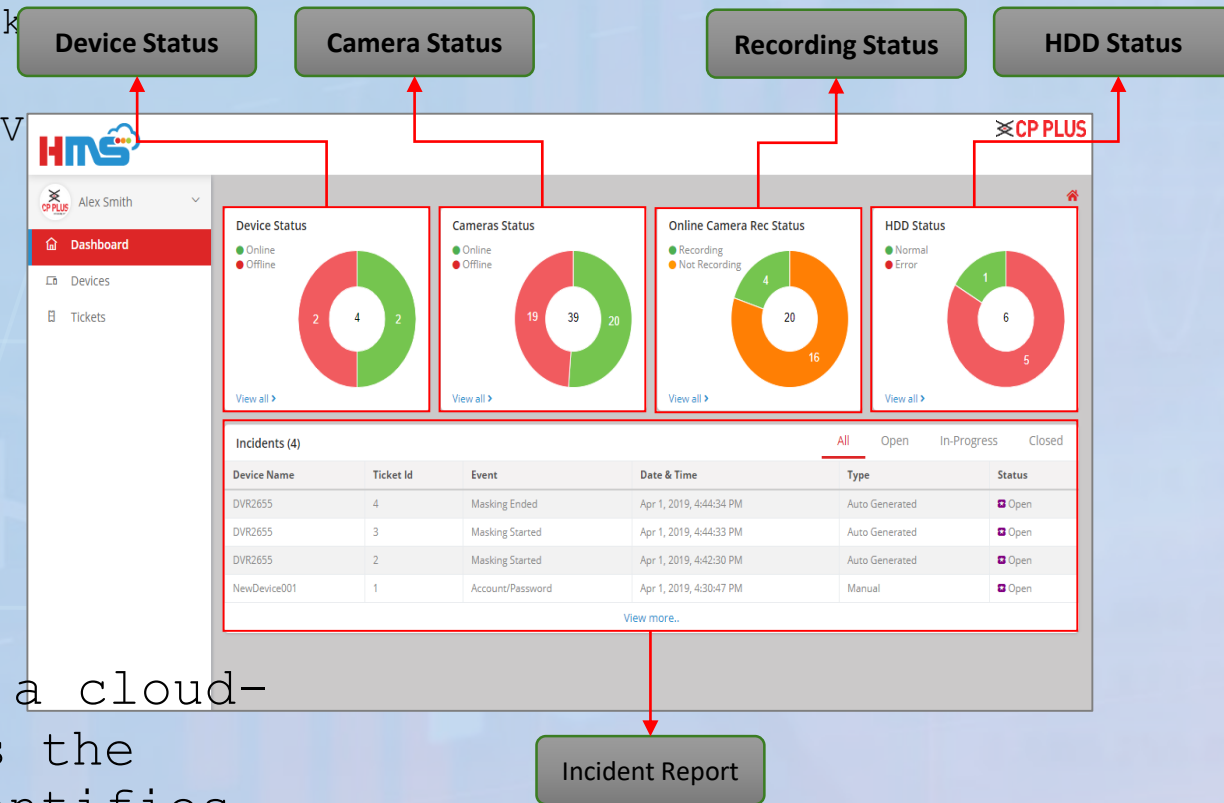

- Surveillance Solution
 - FR & T&A
 - ANPR
 - Perimeter intrusion
 - AI Fix & PTZ cameras
- Mobile NVR Solution
- Body Worn Camera

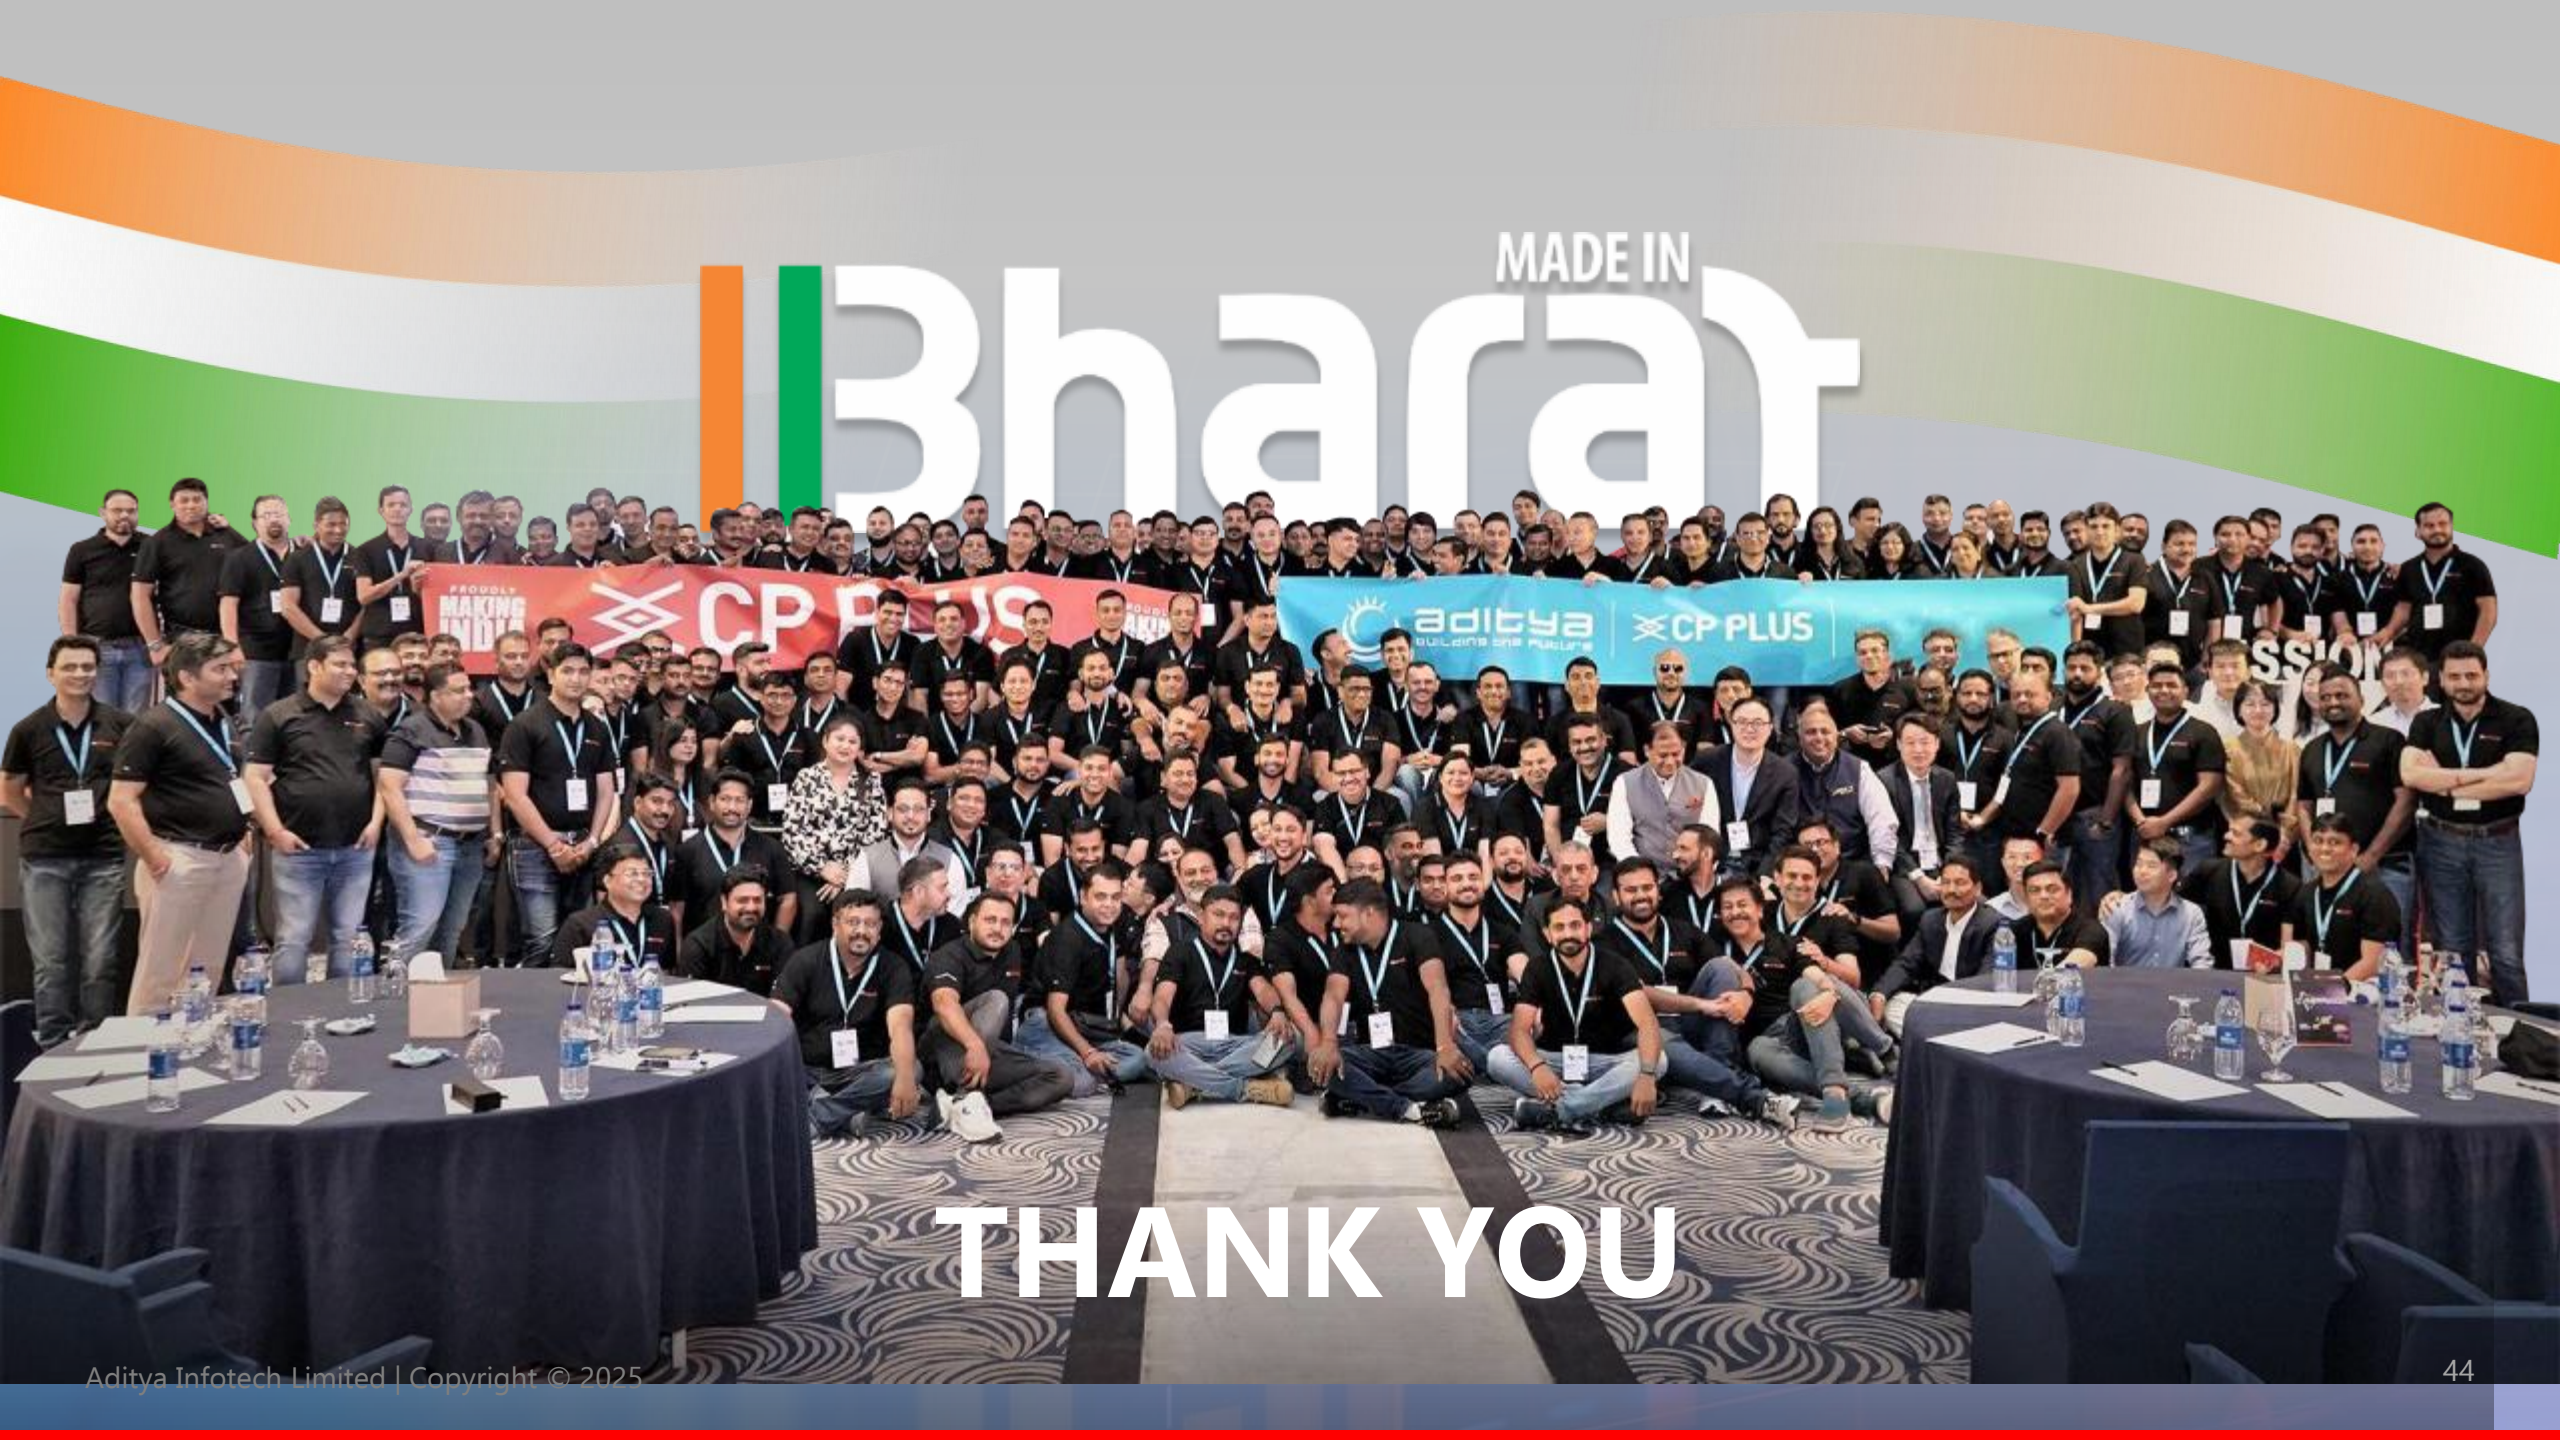

Health Monitoring System

- The issues with current surveillance system:
 - After installation of CCTV system, we don't check working status of devices
 - No evidence video found due to nonfunctional CCTV system
 - No alerts for failure of devices or recording.
 - Loss of actual significance.
 - To overcome these issues CP Plus introduces HMS (Cloud monitoring system), which give us
 - Regular Health check of our CCTV system
 - Instant alerts for critical incidents mentioned below

HMS (Health Monitoring System) is a cloud-based subscription service that monitors the health of CCTV Cameras & Recorders & identifies inherent issues in CCTV implementation that impede its functional efficiency thereby ensuring 100% availability with real-time notifications and robust ticketing.
